USCULAR
EVELOPMENT

foreword

Growth in the future is the theme of the 1965 Mirror — growth reflected in the faculty, plant construction and students.

Modernization is the key word and this progress is evidenced in the expansion of certain academic areas, such as the new courses in studio and art history. Not only the art department but also the history, psychology, sociology, English, philosophy and religion departments have gained new professors, both permanent and visiting.

This year Dana Hall will be completed and will include all of the latest chemical facilities. Dana Hall is the culmination point of almost twenty years of construction which has doubled the size of the campus. This construction has included the Fine Arts Center and the new Carnegie science wing. Now plans for remodeling some of the older dormitories are underway.

Campus organizations are rapidly being improved and new ones are being formed as the need arises. The former Christian Association has now become the Campus Association. One of its most popular innovations is its "sandbox" lecture series. The Women's Council is also entering a new field by sponsoring cultural trips.

In the students themselves this growth is manifested in maturing minds and changing attitudes. The image of students in college a generation ago wearing racoon coats, cheering at large football games and dancing the Big Apple no longer matches the Bates student. His outlook has broadened to a concern with local, national, and international problems. During the year students sponsored a drive to raise money for multiple sclerosis, visited a southern Negro college, and organized work projects to Pineland Hospital which shows their ever-increasing scope of interest.

This yearbook is planned to show these and the many other ways students grow to meet the challenges of a changing world.

for 140 years of service . . .

The class of 1965 takes great pride in acknowledging the loyalty and interest of three outstanding Bates professors, demonstrated by nearly a century and one half of service. The students and faculty of Bates are not alone in their deep gratitude. The state of Maine and the nation owe much to the trio whose sound scholarship, effective teaching, originality in scientific research, and personal influence on students, teachers, and friends the world over have proved invaluable.

Although their terms as members of the Bates faculty are drawing to a close, we look forward to seeing them on campus and in the two science buildings, towards which they have contributed so much time and effort.

Although Dr. William Sawyer officially retired as a member of the Bates faculty in 1963, he is still warmly welcomed whenever his footsteps turn him homeward toward Carnegie Hall. Of the three scientists mentioned here, he has served Bates the longest, having been a faculty member since his graduation from Bates in 1913. He was a Graduate Assistant in Biology from 1913-1915, an Instructor from 1916-1921, and received his full professorship in 1929. Meanwhile, he received his M.A. from Cornell in 1916, and his Ph.D. from Harvard in 1929. He was chairman of the biology department when he retired.

His love for Bates dominated his immeasurable pride in his department. As a teacher, he believed that his time belonged primarily to teaching and to student problems; and it was evident that he found some of the best solutions to these problems by joining his students on a mountain climb, a trail-clearing expedition, or a fishing trip. For many years he was advisor and chief innovator of the Bates Outing Club.

At present, Dr. Sawyer is serving as director of the visiting scientist's program for schools in Maine, New Hampshire, and Vermont. This project is sponsored by the Northern New England Academy of Science and supported by the National Science Foundation.

"And yet withal a quiet man who some day is going to be a professor of Biology at Bates . . . His greatest pastime is catching cats and exercising Gordon Cave, and he is equally proficient in both."

Mirror 1913

A scientist who is respected, a teacher who is loved, and a wit of repute, Dr. Karl Woodcock, '18, is an unusual professor of physics. He is equally at ease discussing intricate problems of nuclear physics or outlining the best plan for wiring a house. He enjoys photography, radio, television, electronics, surveying — in fact anything involving mechanics.

Karl Woodcock came to Bates in the fall of 1914 as a student, and upon graduation in 1918 remained as an instructor in the department of physics. He studied summers until he secured his master's degree in 1922. Then in 1932, after a leave of absence, he earned his Ph.D. from the University of Chicago.

He has been head of the physics department for the last several years. His interest in astronomy led to the development of a course in that field, and recently he was influential in the construction of a planetarium in Carnegie Hall.

Dr. Woodcock has long been a member of the American Society of Physics Teachers. Locally, he has served for the last several years as radiological defense chief for Maine Civil Defense. In this connection, he has taught several courses in Maine on the Fundamentals of atomic and nuclear physics.

Born in England, educated in Canada, with a Ph.D. from the University of Toronto, and since 1921 a Stanley Professor of Chemistry at Bates College, Walter A. Lawrance has successfully combined the duties of teacher and those of industrial and research chemist. A tremendous worker, Dr. Lawrance sets high standards for his students both in technical excellence and in integrity. His retirement in 1965 will coincide with the completion of Dana Hall, a new chemistry building which Dr. Lawrance has supervised since its conception.

Dr. Lawrance is also well-known outside of Bates College. During World War I, he developed a unit operation system whereby non-professionals were each taught a single step in a chemical process. This plan worked to spread scientific skills and to relieve shortage of chemists.

It is, however, in the problem of river pollution that he has won greatest fame. The Herculean task of cleaning up the Androscoggin River was assigned to him in 1947 when he was given the title of Rivermaster. Today Dr. Walter Lawrance is recognized internationally as an authority on river pollution by industrial wastes. Chemistry majors now in industry and schools the country over recognize their debt to him. All Bates men and women are proud of the contributions he has made to the field of chemistry.

"Yeh — we c'n get wonderful effects — red flames — moonlight to order — 'n everything."

Mirror 1922

Boys returning from downtown late o'nights have often wondered as to the identity of the faithful chemist who burns the bright electrics into the wee small hours of the night. Rumor has it that Doc Lawrance is discovering new compounds and one of these days . . .

Mirror 1924

president charles f. phillips

With this year, and the class of 1965, Bates enters upon its second century as a college. There have been many changes since its beginning, each indicative of progress. In fact, many earlier graduates may not even recognize in Bates the college they once knew, so great have been such changes as Lane Hall, Dana Hall, the experimental psychology lab and the co-ed lounge.

Lane Hall, a central symbol of this progress, now houses almost all of the administration personnel. The building was opened for use this fall, and it contains some efficient modern offices, as well as some comfortable and charming traditional rooms which provide a gathering place for formal meetings and receptions.

The administration of President Charles Phillips is strongly reflected in the new look at Bates. Under his leadership the college has vastly improved its physical plant by remodeling many of the buildings, and by constructing a women's dormitory, a fine arts center, and a maintenance center, as well as the new administration building and chemistry laboratory.

Mr. John B. Annett is the Assistant to the President. In addition to official duties he obtains exhibits for the Treat Gallery.

Mr. Frank Stred, the Alumni Secretary, is instrumental in presenting the image of progress to past graduates and others who are interested in Bates, through such activities as homecoming, publications, and alumni meetings.

The *Alumnus* (an alumni publication) is jointly edited by Mr. Stred and Mrs. Ruth Wilson, the new Editor of Alumni Publications. Eventually, she will assume this entire responsibility.

Dean Lindholm's assistant is Edmund Wilson '62, who shares in the yearly cycle of summer interviews on campus and fall visits to high schools.

Milton Lindholm, as Dean of Admissions, maintains and improves the standards of acceptance into Bates. Through his judgement of countless tests and interviews, we obtain a student body which can take part in the progress of the college.

Once a student has entered Bates, personal attention to his needs continues at an accelerated rate. One can always count on Deans Barbara Randall and Walter Boyce (deans of women and men respectively) for help with any private or campus problems. Here, from their new offices in Lane Hall, they discuss together matters of mutual concern.

College campuses seem to abound in deans — and necessarily so. Another important person is Dean George Healy, who has the responsibility of being Dean of the Faculty, organizing chapel programs, and advising students abroad.

Norman Ross, the treasurer of Bates, has the unenviable position of balancing budgets and guarding money as it passes in and out of the Bates treasury.

Sharing this concern with finances is Lawrence Jackson, the Business Manager, who has charge of accounting, purchasing, and arranging student accounts.

Registrar Mabel Libby maintains order among the countless records and forms which assure the progress of a smoothly-running college.

Many's the subject who has smiled for Arthur Griffiths, genial head of the news bureau, which prepares Bates publicity releases.

The library staff performs an increasingly important function for each student, as he progresses from an underclassman with a term paper to write, to a senior who must prepare a thesis. The staff consists of Mrs. Helen O'Conner, Mrs. Elizabeth Brown, Mrs. Florence Field, Mrs. Milton Lindholm, Mrs. Mary Riley, Mr. Richard Myers, Mrs. Iva Foster.

The infirmary staff maintains the health of the college community. One can always count on the care and attention available from its members. This staff includes: Miss Dorothy Abbott, Dr. Rudolph Haas, Miss Lucy Johnson, and Mrs. Aurora Cornish.

Another indispensable person is Al Johnson, who heads the force of maintenance men who keep our campus well cared for. The clipboards are an indication of the amount of work which has to be done in each building.

A housemother forms the nucleus of a well-organized and pleasant dormitory environment. She works closely with the proctors in each house. Playing cribbage are: Mrs. Dorothy Oliver, Mrs. Beatrice Towne, Mrs. Helen Cowan, and Mrs. Helen McIntire. House mothers of the men's dormitories are: Mrs. Katherine Lane, Mrs. Helen Bova, and Mrs. Olive Evans.

Mr. John Cagle heads the department of food services, and the supervisory personnel provided by Treadway Inns as caterer.

Working with Mr. Cagle are Mrs. Barbara White, in Men's Commons, and Mrs. Alice Brookes in Rand Hall. These women provide a friendly work atmosphere where student employees help finance their college education.

biology

Carol L. Bishop
Cheshire, Conn.

The class of 1965 witnessed much growth and change in the Department during their four years on campus. Facilities were completely renovated in 1962 to provide room for increasing numbers of biology students. The curriculum includes a wide spectrum of biological sciences, which combine laboratory and classwork to give the biology major a balanced and broad conception of his field. There are special facilities available for those seniors electing to do special research projects; independent study is encouraged.

Dr. Robert Chute became head of the Department upon the retirement of Dr. William Sawyer in 1962. Dr. Mark Crowley and Prof. Robert Wait complete the faculty.

Bates biologists go out into the world to become teachers, researchers, and doctors. They work in a field which is always growing, always fascinating, always challenging. The college years are but a prelude to new learning.

Carol S. Blaisdell
Windsor, Conn.

Thomas A. Bowditch
Rye, N.H.

The Stanton Museum was originally made up of the bird collection of Professor Jonathan Stanton. However, through the years it has acquired specimens of fauna from many parts of the country; it provides an especially fine spectrum of local birds.

The comparative anatomy laboratory contains a collection of specimens representing all of the vertebrate classes. The structures of various animals are compared to reveal developmental trends in basic form and function.

Kendra H. Chandler
Fairfield, Conn.

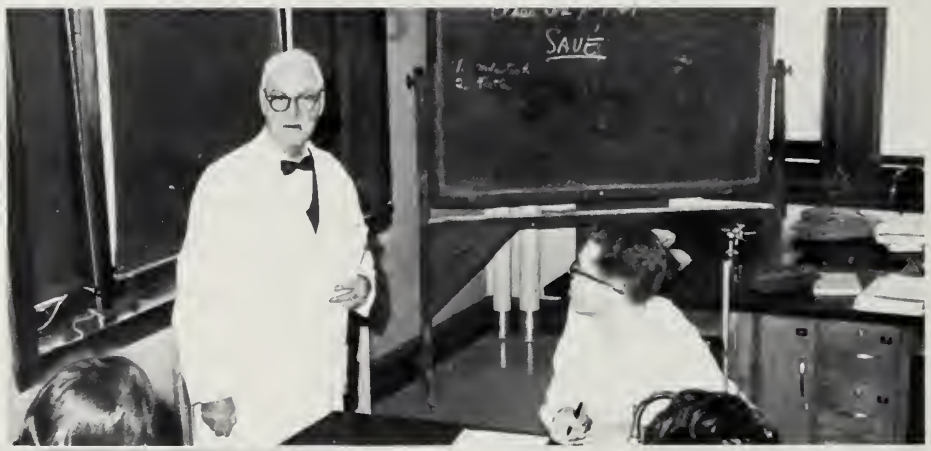
Daniel B. Clarke
Randolph, N.H.

Edward R. Davis
Hampton, N.H.

Anthony DiAngelis
Roslindale, Mass.

Patricia A. Donaghy
Lubec, Me.

Dr. Mark T. Crowley has been with the Biology Department for several years. In this time he has been producing students well versed in comparative anatomy, histology, physiology, general biology and the evils of cigar smoking.



Laboratory assistant Steve Edwards with a curious general biologist.

Consultation over microbes.

A demonstration of thesis research technique.

In these various laboratory glimpses can be seen the progress of students developing basic technique and acquiring new knowledge through study and discovery. The freshman lab provides an introduction to the equipment and nature of scientific study. Microbiology lab gives the student a command of microscopy and precise technique. The senior honors research project is a final application of all skills to a problem which the student attempts to solve through independent work.

Howard S. Dorfman
Hartford, Conn.

William J. Driscoll
Florence, Mass.

Stepehn B. Edwards
Stamford, Conn.

The Biology Library provides references for almost all phases of biological study. Many periodicals and graduate opportunity brochures are also available for general use.

An Honors Graduate of the department.

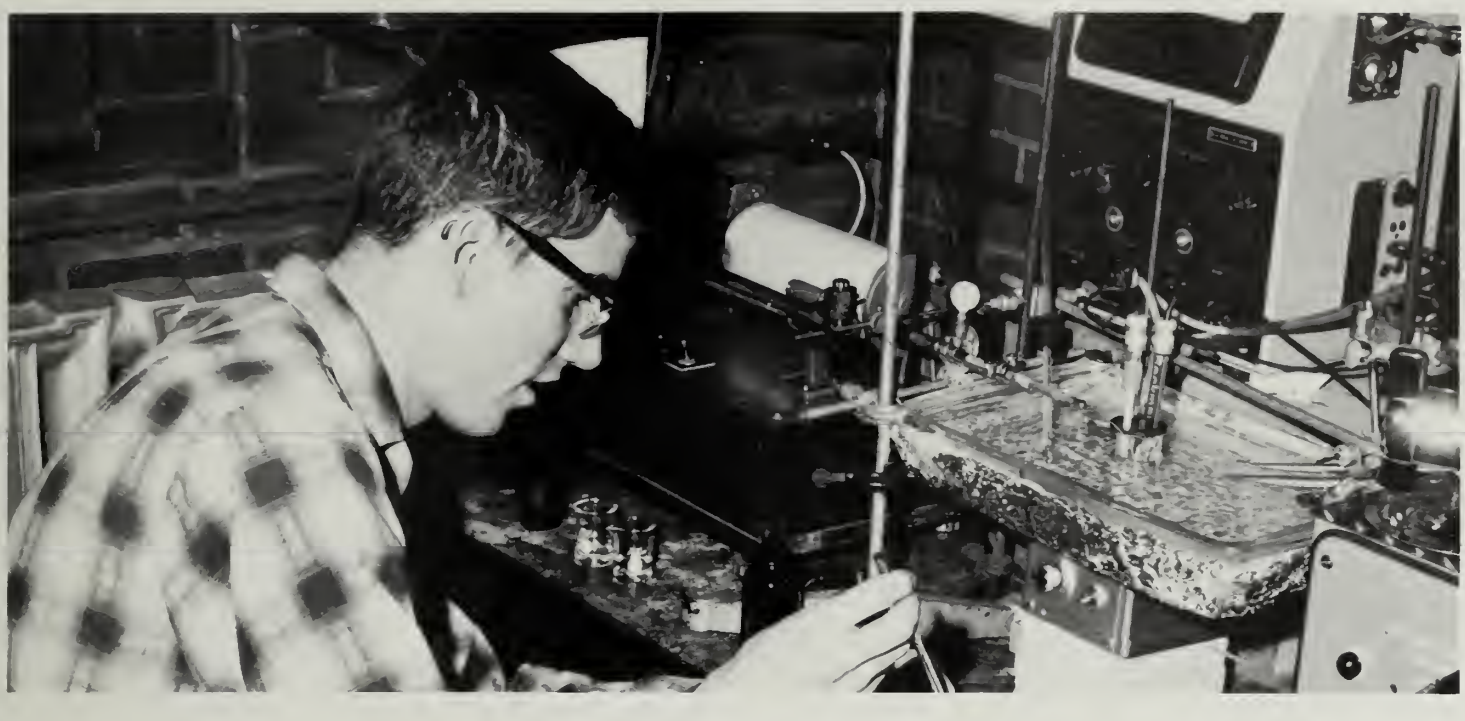
New Hyde Park, N.Y.

A. Bradford Wyman
Storrs, Conn.

David L. Zuretti
Westboro, Mass.

Dr. William Sawyer, a favorite professor of the class of 1965.

The addition to the Carnegie Science Building has allowed the department to expand considerably. Biology presently is established on the first and third floors with laboratory facilities for each aspect of the curriculum. Walk in incubators, private research rooms, expanded library and roomy 'labs' are all a part of a growing department.



The accumulation of data for a senior honors thesis.

Robert S. Armstrong
Manasquan, N.J.

Dr. Walter Lawrance

chemistry

In the fall of 1965, a new chapter in the history of the Chemistry Department will begin. All facilities will be moved from Hedge Laboratory to the new Dana Hall which provides more space for the presently overcrowded laboratory classes. Apparatus will be arranged more efficiently so students can work with greater ease and effectiveness. Although thesis research projects are now encouraged, Dana Hall will provide enough facilities so that independent study can be stressed to a greater extent.

The chemistry curriculum is a well balanced program providing the student with a solid background in inorganic and organic chemistry. Besides general courses, the chemistry major faces physical chemistry and both qualitative and quantitative analysis. The department is equipped with instrumentation to keep the student up to date with the latest tenchiques and procedures.

Bruce R. Cooper
Tarzana, Calif.

Stuart E. Field
Auburn, Me.

Mr. Ray Thompson quoting the price of a new distillation flask.

Allan Gordan
Woods Hole, Mass.

Dennis D. Keith
Manchester, Conn.

From the old . . .

Bruce Libutti
Pompton Plains, N.J.

. . . to the new.

Dr. Richard Briggs discusses some chemical theory. Since the retirement of Dr. Walter Lawrance in 1964, Dr. Briggs has assumed the organic chemistry courses, while also teaching general inorganic chemistry. His instruction and advice in the organic lab has saved Hedge from being levelled on several occasions.

John W. Norton
Randolph, Me.

Basil A. Richardson
Greenland, N.H.

Richard A. Rozene
Plainfield, N.J.

Mr. Carleton Morrill consoles freshmen distraught by the double pan analytical balances.

Prof. Edward Newsham is Hedge Specialist in Physical Chemistry.

Sheldon S. York
Hamden, Conn.

Even the precision chemists in Quantitive Lab need to laugh off some ridiculous results and find out what happened. Dr. William Thomas instructs the incoming freshmen in General Inorganic Chemistry, and later finds many familiar faces in Quantitive Analysis. Eventually, some upperclassmen delve into his course in Advanced Inorganic.

geology

Curtis L. Talbot
Waltham, Mass.

Prof. Roy L. Farnsworth discusses rock formations.

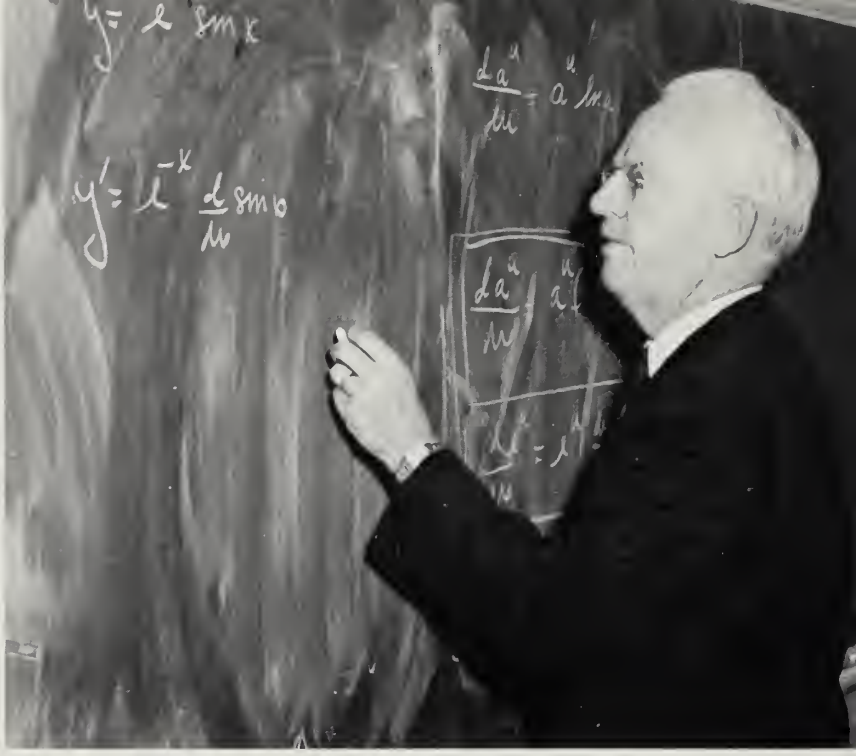
Curtis Talbot and Dick Pfirman classify minerals in lab.

Freshman students study glacial formations on a field trip.

The geology department has increased size, enrollment, and facilities. Old graduates often comment on the vast changes that have taken place since they attended Bates. The space available for department use has tripled. Enrollment is steadily increasing in the Freshman course. Greater numbers of students, majors and non-majors, are also enrolling in the advanced courses due primarily to the emphasis placed on the relationship of geology to the other fields of study and human activity. Each year sees the addition of new books to our library as well as equipment for the laboratory. The members of the department look forward to this upward trend.

mathematics

Could this really be a math major's desk?



Prof. Percy Wilkins explains the answer to a difficult math problem.

Robert K. Blagg
Park Ridge, N.J.

Merrilyn Brown
Newbury, Mass.

The Mathematics Department has recently undergone a revamping of courses. As a result of the completion of this reorganization, a three years' process, the mathematics major can now expect to acquire not only the traditional background in mathematics, but also knowledge in areas essential to scientific and practical application.

As a senior, the math major participates in an informal colloquium where he and his fellow majors each present a lecture on some phase of mathematics not taken up in the actual classroom. It is hoped that in this atmosphere of cigarette smoke and coffee the majors can integrate the knowledge of their combined courses and research into unfamiliar areas with an enjoyable and profitable result.

physics

Arthur F. Amend
Harrington Park, N. J.

Dr. Karl Woodcock adjusts the planitarium projector.

Students work on complicated lab problems.

A complete revamping of the required B.S. and A.B. general physics courses will take place next year. A quantum physics course will be added. Also there will be a redirection of lab work in the lower courses toward individual research for interested students instead of the set of experiments now required. This philosophy will be instituted in the advanced courses also, where stress will be put on depth study of specific topics. The professors hope that their work load would then be lightened allowing them more time for extended course preparation, research projects and publishing.

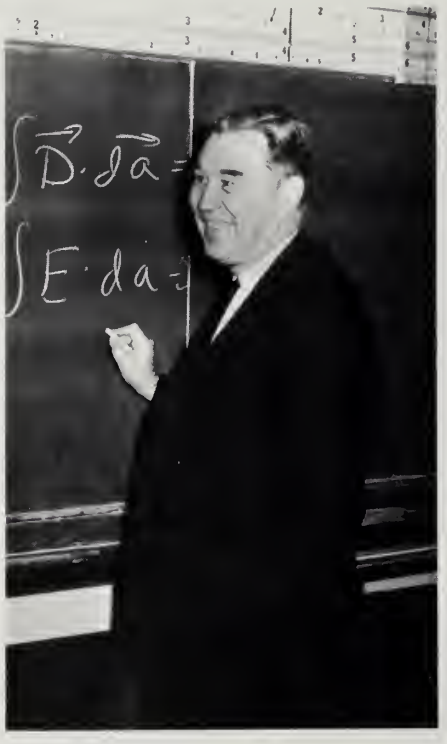
"But it *does* move."

Prof. Carroll Bailey intently probes the circuits of an amplifier.

Frederick A. Stevens
No. Attleboro, Mass.

Prof. Robert Kingsbury proves it isn't so hard after all.



Physics presents an opportunity for constant exchange of new information. It is to this end that the Physics Colloquium functions. Meeting twice monthly, the group presents topics of current interest from the frontiers of outer space research to the classical considerations of laboratory demonstration apparatus. As a member of the American Institute of Physics, the Bates Physics Colloquium takes part in visiting lecturer programs, subscribes to films published by the AIP, and receives a monthly publication, *Physics Today*. Late in each year, department seniors present their theses to the group, discussing both the theoretical and experimental facets of their research. In presenting physics as an exciting and ever-changing field, the Physics Colloquium is performing its service well.

social sciences

Worcester, Mass.

Economics majors at Bates College are presented with the opportunity to gain a general knowledge of the field, to lay a foundation for a career in business, or to prepare for graduate study.

Many economics majors obtain their initial interest in the field from Dr. Walther's core course. After deciding to make economics their major field of study, they readily accept the opportunity to obtain theoretical and applied knowledge of the subject matter. Introduction to Economic Analysis and Public Policy are presented by the department head, Dr. Chances. He also provides the leadership in the investigation of Economic Theory. Dr. Walther assists in the process by promoting understanding of statistics, international economics and macro-economic policy. Professor Williams makes a significant contribution in the areas of accounting, corporate finance, labor relations and marketing.

The majority of the economics majors supplement requirements with other courses essential to their career aims. A comprehensive program, such as this, prepares the individual to make a worthwhile contribution to the economic world.

Prof. Theodore Walther snatches a snooze.

Richard C. Danosky
South Lincoln, Mass.

Prof. David Williams discusses a marketing case.

Frank Delisi
Verona, N.J.

Two of the more interesting theses are being written by Kirby Noye and Dick Danosky. Kirby's thesis is entitled "Land Taxation in Undeveloped Countries." He is exploring the different types of land taxation and the economic effects upon the countries. The pros and cons of possible tax reforms are also a subject of consideration. Dick's thesis is entitled "International Transmission of Business Cycles." He is investigating how a business cycle of one country transmits its effects to other countries through the balance of payments and capital movements.

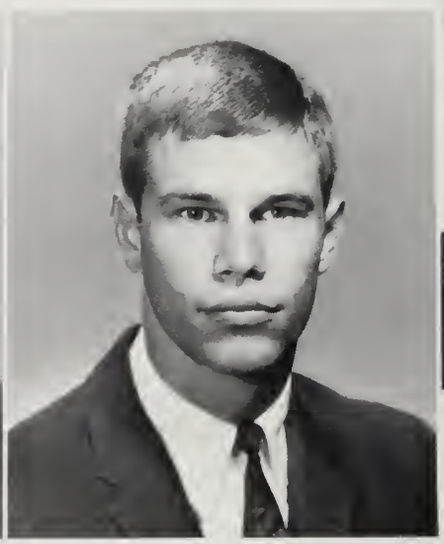
government

In order to help our students understand this ever changing world, Bates has increased the quantity and quality of courses offered in the government department. Dr. Thumm, chairman of the Social Science Division, specializes in the field of American government. Few political figures or events are safe from his analytical mind and sharp humor. International governments and politics are covered by Dr. Wright. He is known for his interesting classes and for his work on the Outing Club. Many a mountain climb has been chaperoned by T.P. carrying a knapsack with a peanut butter sandwich and a pile of uncorrected exams.

Stephen P. Adams
Fairfield, Conn.



Donald J. Beaudry

Princeton, N.J.

The Government Seminar grills Sue Shea on her thesis.

Peter M. Weatherbee
Hampden, Me.

Senior theses offer a chance to the industrious student to do some deep independent study. Sue Smith's Honors Work is being done on the problem of apartheid in the Union of South Africa. Is a reconciliation possible between the Blacks and Whites? Urban renewal in Connecticut is the subject of Steve Burlingame's research. He presents a penetrating insight into the problems of city politics. Although many months are spent on these studies, the sense of accomplishment upon completion makes the effort seem worthwhile.

David A. Williams
Elmira, N.Y.

history

The History Department consists of five professors and twenty students. Of those professors, three of them — Dr. Muller, Dr. Leaman and Mr. Hsieh — serve only the History Department. Of the other two, Dr. Niehaus is assigned to the department specifically to cover British history, and Dean Healy to cover French history. Dr. Muller, as head of the department, supervises all of the students majoring in history, although senior theses are read by all of the men.

The courses offered in the department cover a wide range of subjects, from Ancient History to Far Eastern Civilization. Each of the men connected with the department is competent in several specific fields of history, so that seniors have an almost unlimited personal choice for thesis topics. This year, for instance, students are writing on topics ranging from the Antinomianism of Ann Hutchinson to the Czechoslovakian Legion of the Second World War. One unique course in the department is the seminar called Historiography, open only to ten junior majors each year. Each student is assigned a book to analyze; but rather than develop a discussion centering around the subject matter of the book, it is the historian, himself, that is of concern. Historiography includes historical methods and philosophies, and how these affect an historian's treatment of his subject.

All of the courses, with the exception of the junior and senior seminars, are run on a lecture basis, with an occasional day reserved for questions and answers. The class sections are usually large in size, requiring this lecture method. The emphasis of the department lies on all aspects of history — political, social, economic and national — so the individual student can always find something to interest him personally.

languages

Prof. Robert G. Berkelman
"Good students plan ahead."

english

Professor Robert Berkelman heads a department of six people who combine forces to give Bates' students a solid background in writing and an appreciation of the world's great literature. The English Department offers a wide variety of courses ranging from intensive studies of English and American literature to a creative writing course. Majors in this field are required to take four semesters of British Literature and a comprehensive course in Shakespeare.

This has been a year of many changes in the English Department. Both Dr. Parsons and Mr. Deiman are new faces on the Bates faculty. Dr. Parsons replaces Prof. Tagliabue who is on sabbatical for the year. She received her degree from New York University and came to us after having spent several years as head of the English Department at a large high school in New Jersey. Mr. Deiman considers English as only one of his pastimes; he is also proficient in many languages and is an accomplished pianist. At present he is working for his doctorate at Yale University. Mr. Nelson has also had a busy year, combining teaching with active work on his doctorate which he hopes to receive from Cornell.

As can be seen, both students and faculty in the English Department work intensively to get a well-rounded, integrated view of both American and European literature, simultaneously gaining a better understanding of themselves and their times.

Prof. Paul Whitbeck
"The smile that can't be captured."

german

The German department in recent years has had the advantage of being able to attract students who have had firsthand contact with not only the language but with the country. Liz Frangedakis, for example, lives in Frankfurt, Germany, and has commuted to Bates for four years. Penny Barbour studied in Berlin one year, under the American Friends Program.

A growing interest in the German department is evident in increased enrollment in the advanced courses, and in the large number of new books purchased by the library. Further opportunity to enjoy and use the language is afforded through the German Club, and in Professor Buschmann's extensive record library of opera and lieder, which lends much to his classes. Through Miss Garcelon, students interested in speaking German have become acquainted with Mrs. Hirschler, a local German-American woman. Frequent invitations to her home result in lively conversations from contemporary to literary topics over "eine tasse tee."

Miss Garcelon, presently studying for her doctorate, has been trying to introduce new experimental methods of instruction. A highlight of one course was the division of a modern drama among the five class members, who then typed their translation of the play.

Prof. August Buschman

"I got you on that one!"

french

Mr. Robert Havers ponders a student's remark.

This year the French Department had four seniors returning from a Junior Year Abroad in "le beau pays," and the variety of accents and literary ideas has contributed greatly to activity in class and in the French Club.

Drs. Wright and Caron shared the advanced courses, while Mr. Havers taught most of the introductory and intermediate courses.

Dr. Caron taught Oral French first semester and kept coming out with surprises such as explication and multi-authored Dadaistic poems. Second semester he taught 20th century from a theatrical point of view.

Dr. Wright, "l'enfant terrible" of the French Department, has classes going from comments treating the style and structure of a Stendhal novel to the habits and practices of nineteenth century "courtisanes" and their camelias.

spanish

Prof. Robert D. Seward reads excerpts from *Don Quixote.*

William S. Arata
Brooklyn, N.Y.

Joanne L. Campbell
No. Andover, Mass.

In the Spanish department there are three professors. Dr. Wright's specialty is genre, Professor Seward is known for his thorough explanation of grammar, especially the subjunctive, and Miss Garcelon, enjoys discussing characterization in Spanish novels. Also in the department are loyal majors who, by now, instinctively head for 203 Hathorn. Several of them have been inspired to increase their knowledge of the Spanish language and culture by traveling. Bill Arata has studied in Mexico and has traveled in Spain after working in a hotel in Barcelona. Karen Smith took some summer courses at the University of Mexico in Mexico City.

This year the Spanish majors are producing many interesting thesis including a study of Goya by Rosie Staddie and a study of the influence of the Spanish Civil War on the novel by Joanne Campbell.

Miss Barbara Garcelon speaks to her class on irregular verbs.

Karen E. Smith

Sharon L. Templeman
Plainville, Conn.

Miss Lavinia M. Scheaffer studies a new play.

speech

All students take elementary courses which provide much needed practice in speaking before groups. Department majors choose a further emphasis in debating or dramatics. Like Sharon and Noreen, they all serve as assistants, and eventually help with advanced courses. These subjects are useful to those preparing for many careers such as broadcasting, law or teaching.

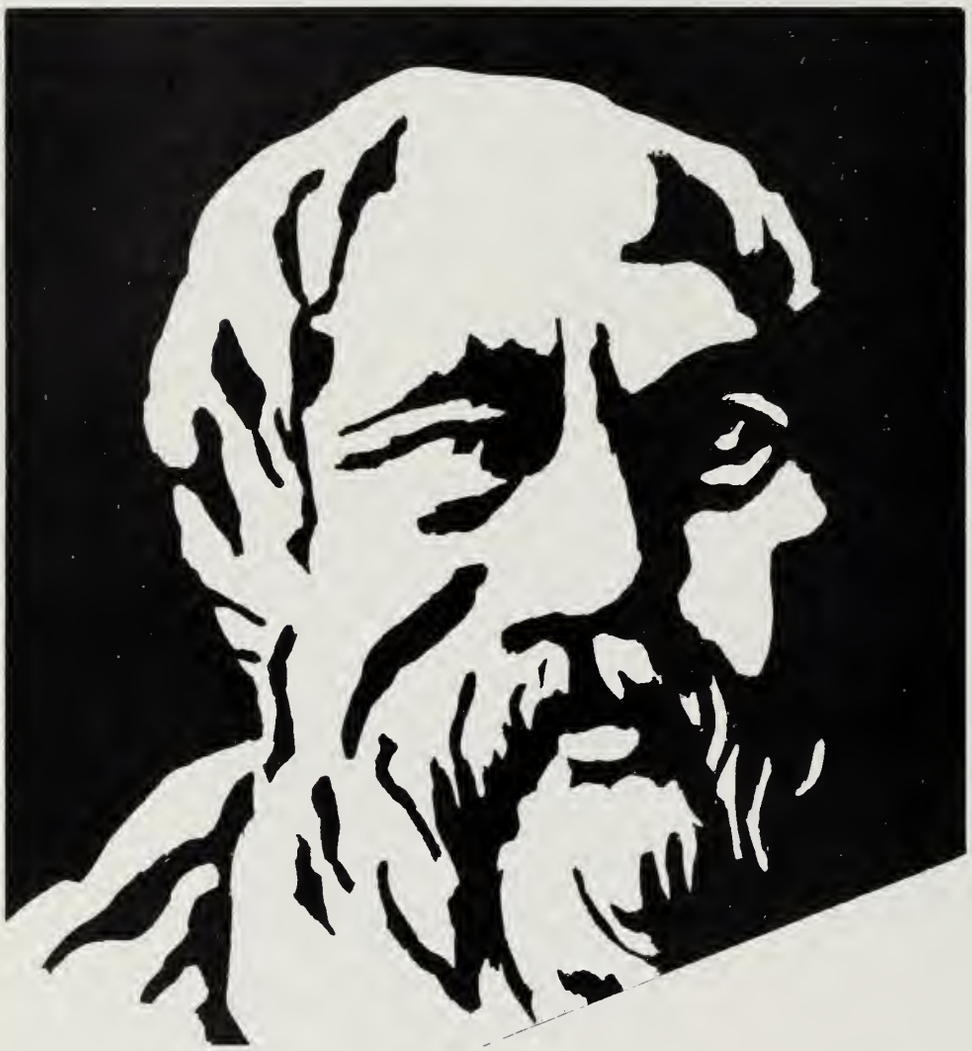
Prof. Brooks Quimby is debating coach and department head.

Noreen Nolan
Cheshire, Conn.

Prof. Richard J. Warye is amused with a student's speech.

humanities

philosophy — religion



Philosophy-Religion offers a stimulating and rewarding challenge to its majors. The desire and interest of the student determines which aspect of this double major is stressed. Being composed of such a small group, it is possible for the students to have a greater leeway in determining the direction of these courses. Seminar courses in Religion and Culture. Philosophy and Science, and metaphysics offer the student a chance to pursue a more independent study of a subject. In these seminars the atmosphere is more informal than a regular class. Oftentimes the students are able to choose not only the topics which they want to discuss but also the method of approach to the chosen topics. Occasionally "illegal" class sessions (marathons) are held in the evening at a prof's home. Such classes tend to increase the informality of the meeting and encourage self expression.

Heading the department is Dr. Joseph D'Alfonso who is familiar to most all the campus as the professor of core philosophy. Having taken an unexpected vacation first semester, he was enthusiastically welcomed back second semester. Dr. George Goldat and Dr. Dwight Walsh divide their time between Philosophy-Religion and the noted Cultural Heritage Department. Mr. Arthur Brown and Dr. Theodore Messinger, both newcomers to the Bates faculty, teach religion and philosophy respectively.

Mr. Arthur Brown
"Now, dearly beloved ones . . ."

Peter P. d'Errico

Dr. Joseph D'Alfonso
"Of course D'Alfonso's rules include relaxation."

Irwin H. Flashman
Dorchester, Mass.

Shirley K. Fuller
Brattleboro, Vt.

The mere mention of the word thesis invokes many reactions among seniors —panic, thought, frustration, and excitement. Choosing the right topic is the first and perhaps most important step. Shirley Fuller and Barbara Reed, both Religion-Philosophy majors, chose interesting subjects. Shirley did a study covering the critique of art and the value of modern religious paintings by comparing the works of some contemporary artists. Barb investigated the specific interaction between the language and structure of the hymn, pointing out how these two elements are necessary and complementary to each other in expressing its message.

Samuel C. Withers
Washington, D.C.

During the past year, Bates has shown progress in many areas. The Department of Psychology has certainly benefited from this growth. With the establishment of the new Experimental Psychology laboratory on the third floor of Carnegie Hall, psychology can now be thought of as science in the true sense of the word. Under the direction of Dr. Bechtel, students can obtain a first hand knowledge of the basic principles of Experimental Psychology.

Two senior psychology majors have used the lab in which to conduct experiments in connection with their theses. Karl Wolf made an intensive study of the phenomenon of imprinting, and Frank Sroka investigated the high school drop-out problem.

Last Fall, we were fortunate enough to have Dr. O. Hobart Mowrer, the well-known psychologist, as a visiting lecturer. Dr. Mowrer, met with various campus organizations and attended a number of classes in which he elaborated on his theories.

During the second semester, Mr. Louis M. Aaronson, visiting professor in psychology, conducted the classes of Dr. McCreary, who was on sabbatical at Harvard University. Mr. Aaronson did his undergraduate study at Harvard and has done graduate work at the Universities of Pennsylvania and Oregon. Recently, he has been working toward his doctorate at the University of Liverpool in England.

"Well, when I was in college . . ."

Dr. George Fetter
"Now there are primary groups and there are secondary groups."

With Dr. Jonitis on a year's leave of absence doing research for the State of Maine on a Federal grant, the sociology department has recruited two new professors, Dr. Catherine Hamilton and Dr. George Fetter.

A native of Scotland, Dr. Hamilton received her A.B. and M.A. degrees in economics and psychology at St. Andrews University in Scotland. She continued her studies at the University of Toronto, in Canada, where she received a second master's degree and her Ph.D. in social economics. She was the head of the sociology department at Keuka College in New York from 1945 to 1957. Later, she served as head of the sociology department at Barber-Scotia College, Concord, N. C. Before coming to Bates, Dr. Hamilton was director of special services as a professor of sociology and anthropology at Livingstone College in North Carolina.

Dr. Fetter, originally from upstate New York, did his undergraduate work at Hamilton College. He served as a commander on a P.T. boat during World War II. After returning from the Pacific, he received his M.A. and Ph.D. degrees in sociology at Cornell University.

He has taught at Linfield College in Oregon and Central Washington College. For three years he served as chairman of the department of sociology and anthropology at the American University in Beirut, Lebanon. Most recently, Dr. Fetter has been director of a Peace Corps Training Center at Oregon State University, where he trained volunteers for service in North India.

The department of sociology has benefited by the addition of these two well-qualified professors.

sociology

Sharon L. Fisher
Haverhill, Mass.

Louise Kennedy
Hebron, Me.

Dr. Peter P. Jonitis
"When I was in Jordon . . ."

Robert J. Lanz
Lewiston, Me.

The Sociology majors are working on a variety of interesting theses this year. Louise Kennedy is doing a study of case histories to determine the causes of disruptions in the family unit. In conjunction with this, Louise is doing social work in Lewiston with the Department of Health, Education and Welfare. Sharon Fisher is studying the social implications of Eugenics. The history of parole and a prediction of its success is the subject of Linda Reisner's study. An interest in business has led Bob Lanz to do a study on the effect of incentives in business.

Sociology students gather information for their theses.

Linda L. Reisner

Dr. Catherine Hamilton
"In this course you read what you want."

other fields

arts

Since this is a new area at Bates, Mr. William Mitchell (left) is responsible for organizing the entire art curriculum. There are two separate but related areas of concentration — academic and practical. Courses in the history of art are supplemented by actual studio experience in such forms as drawing and painting.

secretarial

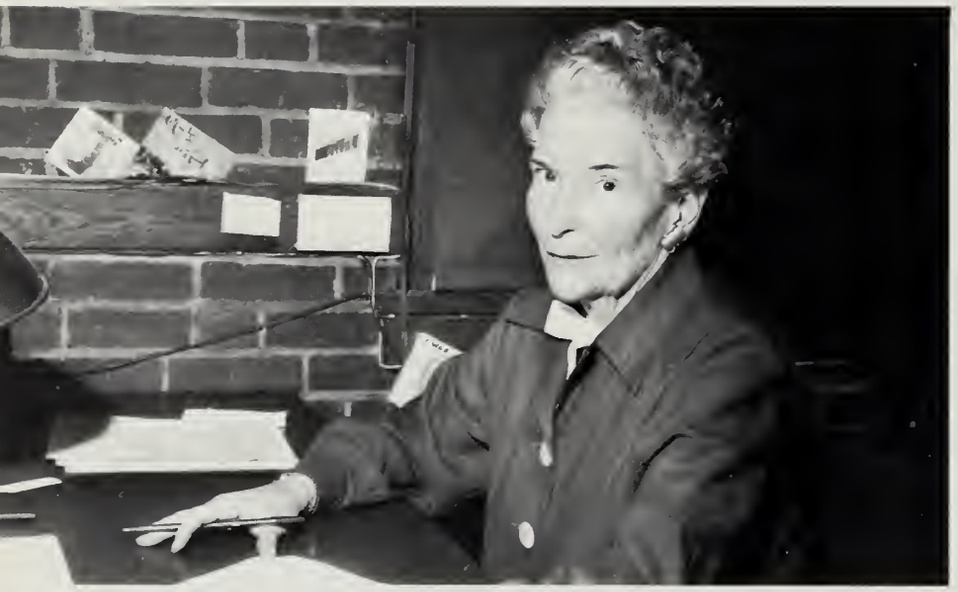
Go down the left-hand stairway of Libby Forum, and you will find the rooms where Mrs. Eleanor Morse (right) conducts classes in typing, shorthand and transcription. Those who complete this program are qualified to become secretaries, but many simply take this training in addition to preparation in the major subjects.

music

The Gannet room in Pettigrew Hall is the center of musical activity. Its ceiling and walls are acoustically designed, and it contains modern electronic equipment. In this setting the various campus musical groups which practice here can record their performances, and Professor D. Robert Smith (left) can play recordings to illustrate his lectures.

Mr. Mitchell shows slides to supplement his art history course.

physical education



Dr. Evelyn K. Dillon

Miss Janet K. Nell

Mrs. Joan Hinman

The women's physical education department, under the energetic leadership of Dr. Evelyn Dillon, offers a challenging and expanded program. Much of this activity is conducted off campus, under the direction of various instructors, each specializing in her favorite field. Miss Nell travels twice a week with the ski classes to Lost Valley in Auburn, and coaches the field hockey team which sometimes represents Bates at play days with other colleges in the area. In addition, her golf classes try the Martindale Country Club in Auburn. Mrs. Hinman's bowlers use the Holiday Lanes and she has also accompanied girls who participate in intercollegiate fencing matches. Using the YMCA pool in Auburn, Dr. Dillon offers a swimming program which includes synchronized swimming and courses in lifesaving and water safety instruction.

Mr. Lloyd H. Lux

Under the man's physical education department, there is an opportunity for everyone to exercise his athletic abilities, even those who do not participate in either varsity or intramural sports. All members of the male side of campus can use any department facilities: as evidence of this fact, many spend spare time working out in the weight room, running around the track, or playing a game of handball. Freshmen and sophomores follow an organized program of activity, while juniors are free to exercise three hours a week at their own convenience. The staff also offers academic courses in subjects such as methods of teaching physical education for those who want to pursue further study in this field. A testimony to the excellence of the staff is the fact that Walt Slovenski, the usual track coach, is presently in Mexico, helping to coach the winter olympics there.

Mr. Robert R. Hatch

Mr. William J. Leahey

Mr. Walter Slovenski

Mr. Robert R. Peck

social

activities

service

Women's Council: Presidents: *STANDING:* Pauline Spence, Nancy Muzio, Joyce Cook, Bonnie Mesinger, Priscilla Brown, Ellen Hansen, Carol Brown, Anne Googins, Ruth Christensen. *SEATED:* Laura Hoyt, Linda Taylor, Jane Downing, Louise St. Laurent, Karen Smith.

women's council

The Women's Council is the governing board of the ten girls dormitories. The board is headed by two senior women, both past proctors, Janie Downing, the Chairman, and Louise St. Laurent, the Vice-Chairman. They are supported by the other current dormitory presidents and the first vice-president of Page. The purpose of the Council is to co-ordinate dormitory policy and rules through the Honor System. It is the Women's Council which administers the Freshman Orientation Program and freshman rules. It is also this group, working with the Men's Council, which is responsible for the enjoyable haze day program.

This year, under Janie's leadership, the Council has widened its horizons to include a greater variety of activities and cultural opportunities for the Bates Women. Their first major project was to sponsor buses to Colby so that the women could hear the well known Betty Friedan, author of *The Feminine Mystique*, lecture on her best seller. They have also planned an excursion to Boston which included the Matinee Performance of Swan Lake by the Leningrad Ballet. The annual Christmas Banquet, where the women are treated to a delicious steak dinner, was also possible through the courtesy of the Women's Council. Still another of their endeavors this year was to sponsor a program similar to the men's "Smokers," with informal gatherings of faculty wives and students.

Vice-Presidents: *STANDING:* Claudia Lamberti, Penny Brown, Bonnie Popek, Joan Folcik, Carol Stone. *SEATED:* Judy Laming, Ann Killory, Laurel Booth, Linda Carter, Carol Reed.

Council officials: Steve Edwards, Jan Downing, John Noseworthy, and Louise St. Laurent.

men's council

The Men's Council is the branch of the Student Senate composed of all male proctors. Although the chief concern of the Council is sponsoring activities related to the men on campus, it also works in close co-operation with the Women's Council in fostering . . . co-educational events.

The Council is "chaired" by John Noseworthy, who is aided by Stephen Edwards, the Vice-Chairman, and Richard Crocker, the Secretary-Treasurer. Committees organized by the Council include: "Chase Hall," "Smokers," "The Big Brother Organization," and "Freshman Rules." In its short history, the Council has done much to improve the facilities of Lower Chase Hall, and has worked with the Women's Council in an attempt to improve Freshman Hazing. In addition, the Council has sponsored many successful "Smokers," which are informal discussions between faculty members and students.

The Council welcomes advice and suggestions, as its ever-present goal is to help improve the student activities on campus, particularly those that pertain to men.

Men's Proctor Council: *SEATED:* Doug Macko, Jackson Merchant, Stephen Edwards, John Noseworthy, Alexander Wood, Elwood Trask, Thomas Henderson, Karl Wolf. *STANDING:* Laurence Brown, Arthur Valliere.

Next week – the "Holly"

Mother *said* there would be days like this . . .

haze day

The day was perfect . . . one of those crisp, clear days in October. Costumes had been completed, and the lists of "things to do" — from taking polls on "Do you think freckles are an asset to one's personality?" to measuring waists to find out who would make an "inexpensive" date for Sadie Hawkins — compiled by the "Big Brothers" and "Elves" had been given to the Flunkies.

For some 250 freshmen the day was to mark the end of that age-old institution called "Hazing." It was a busy day, marked by such events as having to sing "Row, Row, Row, Your Boat" backwards, rolling olives across Garcelon Field, and by the usual number of upperclassmen, posing as freshmen for the day, to take advantage of certain polls being taken by the freshman gals.

. . . the shadows lengthened and the crowds began to thin out. Picking up their assorted stuffed animals, polls and other souvenirs, the freshmen headed back to their dorms, weary, but full of memories of the day when they became official members of the Bates student body.

"And how high do you fly? . . ."

". . . there *are* more important things."

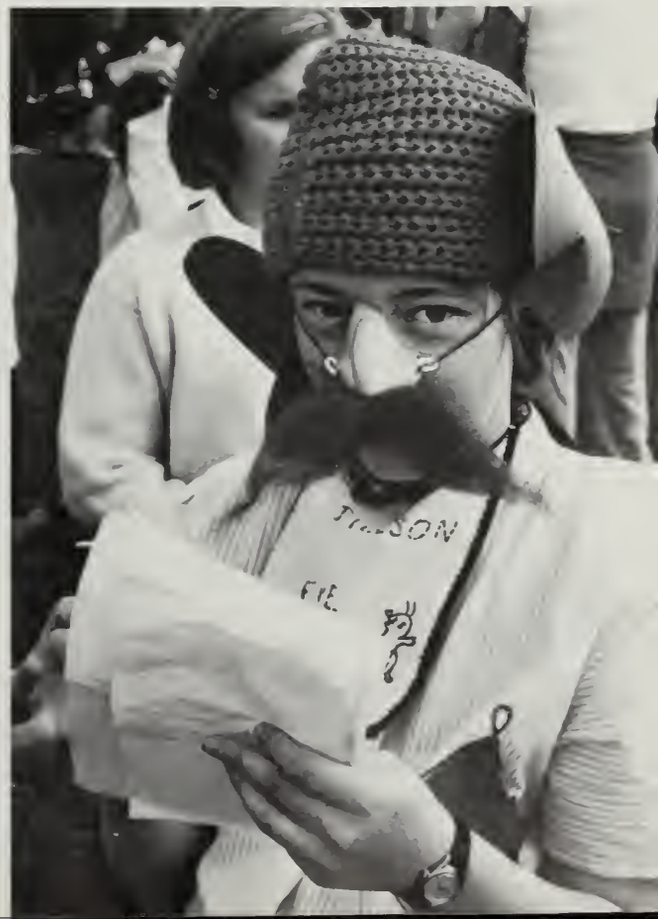
"Little Beaver"

"Best deal yet . . ."

". . . Give us a C!"

"I wouldn't take the 3 year option . . ."

"You think you've got problems!"



Susan H. Smith (Vice President) and Catherine Southall (Secretary) listen attentively while Ned Brooks (President) reads a few words of wisdom to them.

The New Bates Schedule

senate

Uniting the men's and women's sides of campus under one all-campus governing body, the Student Senate has taken upon itself the administration of the seperate men's and women's activities and those involving the entire campus.

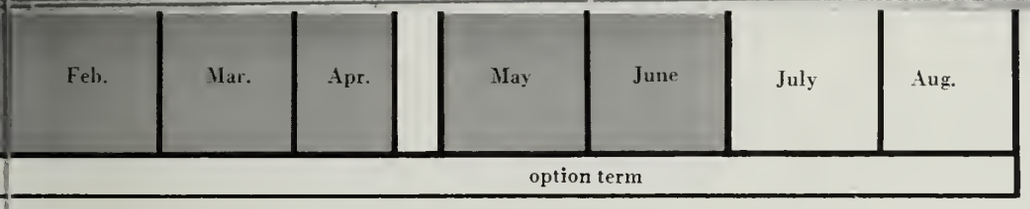
After only a year's existence, the Student Senate fulfills its constitutional purpose to encourage "the formulation of responsible opinions, to foster and organize an active and constructive social life, and to promote a spirit of cooperation among the students, faculty, and administration."

Student-faculty discussion groups, a mock national election, and various opinion polls have organized the thoughts of the students and stimulated thoughtful pondering of campus problems. To help the much criticized social life, the Senate initiated action for a co-ed student lounge and purchased a television set for it. In fostering community-campus cooperation the Senate organized a community collection for the Multiple Sclerosis fund; in campus cooperation, a newsletter put out by the Senate has informed the trustees of the opinions of the student body. Likewise, Student-Faculty discussion groups unite the thoughts and ideas of the students with the college hierarchy.

These are a few of the innovations completed by the Senate, and more are being worked on by Senate committees. The Senate was given a challenge at its formulation: "to take an active part in the intellectual pursuits of the student . . . which are his life." This challenge is being met.

Members of the Senate in one of their more "stately" moods: *SEATED:* Deborah Bartlett, Sara Jones, Prudence Grant, Jane Downing, Edward Brooks, Susan H. Smith, Catherine Southall, Janet Soltis, Ruth Woodford. *STANDING:* Minda Hamelsky, Howard Dorfman, Peter Beckman, James Aikman, John Noseworthy, Jon Wilska, Paul Bertocci, Frances Strycharz.

President Phillips, Herbert Mosher, Peter Gomes, Ned Brooks (moderator), Richard Crocker, Wyland Leadbetter, Charlotte Singer.



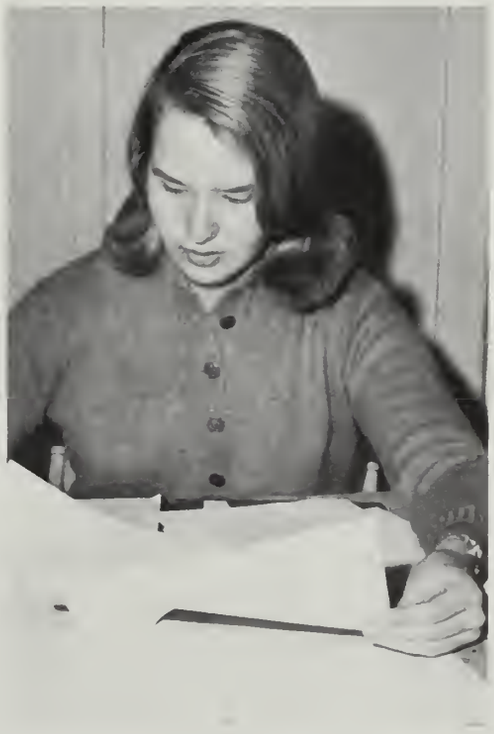
Briefly, under this plan, a student may complete his college education in 3 years, by electing to enroll in the May-June term and by taking a heavier course load during the regular semesters. The grey band diagrams the school under this system. If he chooses this accelerated program, a student would be able to begin graduate study one year earlier, and would also enjoy a substantial saving in tuition.

On Nov. 20, Senate president Ned Brooks spoke to both students and faculty about the 4/3 option. He urged mature reflection and cooperation, and was acclaimed by a standing ovation from the audience. His speech was the first in a series of "sandbox" lectures designed to provide a forum for discussion of issues vital to campus life, and sponsored by the Campus Association. C.A. president Peter Gomes, who introduced Ned, shares the platform with him.

On Nov. 27, at the request of President Phillips, the senate arranged a panel discussion of the option, with Ned Brooks as moderator. President Phillips, Peter Gomes '65 and Wyland Leadbetter '67 were the affirmative, and Herbert Mosher '65, Richard Crocker '66 and Charlotte Singer '67 opposed.

Following a recommendation in Ned's speech, the senate took a poll to determine student and faculty opinion about the option. Various senators collected and compiled the results.

Jan Soltis, a member of the Senate, compiling results of the "4/3 option" questionaire.

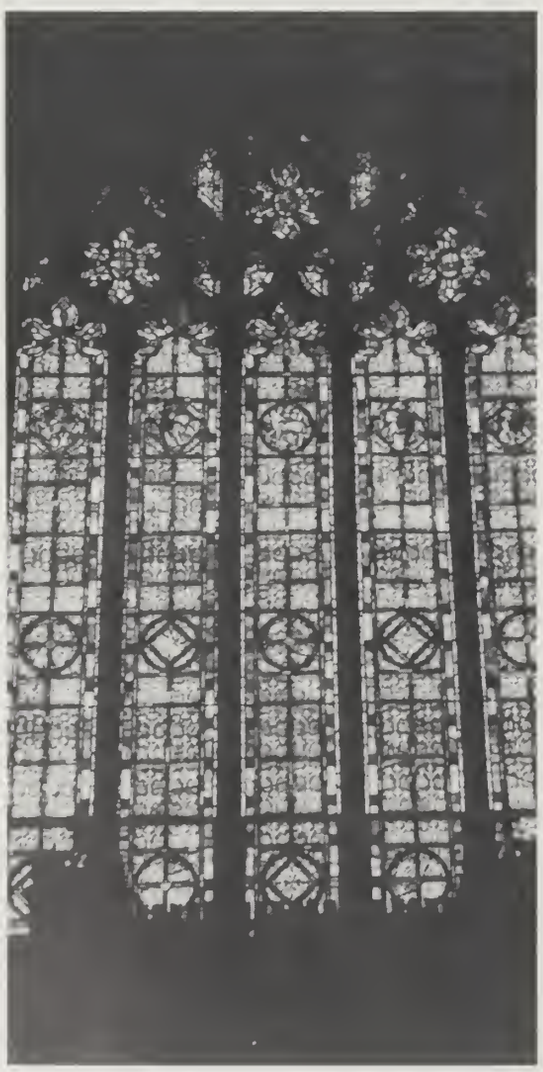


Ned Brooks initiating the "Sandbox" lecture series with his speech on the "4/3 option."

Executive Board. Herb Mosher, Mel Burrowes, Linda Pike, Anthony DiAngelis, Linda Glazer, Don Miller, Ron Snell, Nat Fischer.

campus association

Vespers in the Chapel — an opportunity for quiet meditation.



"Affirming our fundamental faith in the integrity of the individual, we commit ourselves to the liberal spirit of inquiry, thought, and action, which is essential to the realization and maintenance of that integrity."

It shall therefore be our purpose to cultivate this liberal spirit through expression of religious, social — a conscious concern with human relations — and intellectual commitments of our members, the campus, and the larger community."

With this statement in mind, the Campus Association has proceeded to bring these ideals into student life under the guidance of the officers and executive board. The areas of Campus Service, Contemporary Issues, and Community Service are where the C.A. has concentrated its efforts.

Under Campus Service every student is given the opportunity for quiet meditation at Vespers in the Chapel. Freshmen are introduced to Bates during Freshman Week through a number of activities including the IMUR dance just before classes begin. World University Service also operates under this arm of the C.A.

Dr. Bechtel, Anthony DiAngelis and Peter Gomes talk over plans for C.A. projects.

Quechua Indian woman and her child from the Peruvian Andes at Ayacucho, Peru.

Irwin Flashman and Joel Davidson talk about WUS and what it means to Bates students.

World University Service is an international organization founded shortly after WWI for the express purpose of helping university students help themselves. This year at Bates, WUS selected the specific project of aiding students at the University of Huamanga in the Peruvian Andes with money for scholarships.

This University is unique among Latin American educational institutions. Its whole outlook is that of providing students with the type of education that will enable them to help their country raise its standard of living. These students are interested and very much aware of the needs of their country and are willing to work. More than half of the students are of Indian extraction and every student is required to take four years of Quechua, the Indian language of the country. In this manner the benefits of the education the students receive is immediately brought to bear on the problems of the people.

Through WUS, Bates was able to aid these students with over $700 in scholarships.

The C.A. Officers, Ron Snell, Treasurer; Linda Glazer, Secretary; Peter Gomes, President; Anthony DiAngelis, Vice-President.

Marguerite Higgins as she lectures on "The World Is My Beat."

Al Wood helps two students from Lewiston High School in Chemistry as a part of the tutoring program set up by the C.A.

The Commission on Contemporary Issues attempted to bring to the attention of the student body a number of questions which were important in the last year. Persons such as Mr. Thomas Allen, field secretary of the New York N.A.A.C.P., spoke with students about the recent riots in New York City and Philadelphia, the reasons behind them, and what could be done to better the situation in regard to the problems of segregation and job-discrimination. Mr. Fred Moore also was invited to speak. He is a representative of the New England Committee for Non-Violent Action.

A special series of lectures and debates was initiated to discuss the controversial 4/3 plan and was duly dubbed "The Sandbox Lecture Series." This title was taken from a chapel speech given by Dr. Chute which dealt with a number of problems.

The Community Services Commission became involved with a number of activities relating to both the College and the Lewiston High School. Arrangements were made for tutors to help students master material in a variety of subjects. The annual Christmas Party for underprivileged children was held to give them the opportunity of experiencing the joy of the season. People interested in exceptional children could work at the Pineland Hospital under a program established by the C.A. Also, volunteers gave their time to work at Central Maine General Hospital.

Mr. Thomas Allen, field secretary of the New York N.A.A.C.P., and students discuss the reasons behind the riots in New York City and Rochester during the summer of 1964.

F.M.C. and Bates students at the F.M.C. campus.

human rights council

Visiting F.M.C. student talking to Sally Utz. Judy Bushey, and Beth Bassett.

In the Spring of 1964. six Bates students and one professor flew south to Florida Memorial College at St. Augustine to visit for a week. During this time they attended classes, talked with students and professors and generally participated in the life of this all Negro college.

Some weeks later, a group of students from F.M.C. arrived at Bates. They lived in student dormitories here and had many opportunities to examine the student life. Thus began the first exchange of this nature for Bates College.

Last year this venture was supported by the Student Senate and the C.A. Now, however, The Human Rights Council has become associated with the C.A. in much the same way that W.U.S. is. At present, there are plans for future exchanges with some thought given to the possibility of a full semester exchange with F.M.C. or some other college of the same nature.

Prof. West of F.M.C. and Dr. Goldat discuss a specific point.

outing club

COUNCIL: *FIRST ROW:* Carol Reed, Elaine Beede, Judy Marden, Sally Voigt, Debbie Welch, Karen Gulbrandsen. *SECOND ROW:* Beth Patton, Barbara Johnson, Barbara Goodlatte, Sue Alward. *THIRD ROW:* Brent Costain, Joel Davidson, Kenneth Petke, Tom Hayden, Pete Anderson, Roger Marecaux, Don Bean.

If you have ever gone on a ski trip or a mountain climb while at Bates, chances are that it was sponsored by the Bates College Outing Club. This has been the purpose of the organization since it was founded in 1920: to provide students with the equipment and opportunities to enjoy the outdoors. In keeping with this aim, all Bates students are members of the Outing Club.

This past year, the Outing Club has tried to increase the number of its activities as well as plan ahead for the coming 4/3 plan. The Equipment Room has been enlarged to accommodate the new bicycles. Several pairs of boots were purchased for mountain climbs. Climbs and ski trips were run at regular intervals when bad weather did not prevent them. There were several work trips to the cabins and two to the Applachian Trail in western Maine. There are a few things in the offing which will open up new possibilities of activities. One of these is the plan under consideration to purchase an Outing Club vehicle.

OFFICERS: Douglas Findlay, treasurer; Cilla Bonney, secretary; Newt Clark, president; Irwin Flashman, vice-president.

Ken Petke, Sally Voigt, and interested freshmen listen to plans for Carnival.

EXECUTIVE BOARD, *FIRST ROW:* Mollie Anderson, Karen Brown, Virginia Griscom, Sue Huiskamp. *SECOND ROW:* Raymond Danforth, Bruce Wilson, Robert Armstrong, Allen Skogsberg. *STANDING:* Abby Palmer, Dr. Theodore P. Wright, Jr., advisor; Maribeth Perkins, Elizabeth Frangedakis, Susan C. Smith, Bradford Wyman, Penny Barbour.

O. C. members locate scenic surroundings.

Carol Reed, Beth Patton, and Debbie Welch pause before the long climb.

Professors Sampson and Wright look on as students quench their thirst.

Tired hikers pause to rest.

Cilla Bonney and Charlie Love finally reach the top.

Carolyn Hestor captures her audience with the song, "Summertime."

TOP: Basil Richardson arrives at Lake Andrew with the ceremonial torch.

BOTTOM: One of the entries in the snow sculpture contest decorates the front lawn of Page Hall.

The Queen and her court leave Lake Andrew after the crowning ceremony.

TOP LEFT: Mr. Annett, Assistant to the President, congratulates the Queen after her crowning.

TOP RIGHT: Students finish giant snow sculpture for Carnival festivities.

LOWER LEFT: Charlie Love entertains students with his folk music at Sunday River Ski Lodge.

LOWER RIGHT: Two skiers prepare for the slopes at Sunday River.

winter carnival

Winter carnival: 1965 — sponsored by the Bates College Outing Club — was perhaps the most successful and biggest carnival in the history of Bates. The entire carnival showed much ingenuity and careful planning on the part of all of the members of the Outing Club.

Thursday evening, January 28th, marked the beginning of the festivities with the lighting of a huge bonfire from a torch that was carried down from the state capitol by a series of runners; and with the crowning of Carnival Queen, Miss Lyn Avery.

Following the crowning and a steak dinner, couples were taken on sleigh rides and hayrides in wagons, pulled by National Champion Clydsdale horses. After the sleigh rides, they returned to Chase Hall for a "Hayloft" Party.

Early Friday morning, some two hundred students went to Sunday River Ski Area for a day of skiing, tobogganing and dinner, followed by entertainment by Mel Burrows and Charlie Love.

On Saturday, there was a hocky game during the day, and a formal dance, "Sleighride to the Stars" in the evening. Sunday afternoon, the events of the weekend were concluded with a concert in the gym, featuring Carolyn Hestor and The Brandywine Singers.

The Queen of Winter Carnival: Lyn Avery

Saturday evening marked the high point of the weekend with the dance, "Sleighride to the Stars," featuring the music of Dick Madison's Band and decorations by Patton-Anderson, Inc.

The Queen, Lyn Avery, accompanied by the members of her court — Carol Bishop, Penelope Cande, Anne Googins, Minda Hamelsky, Judith Morris and Karin Mueller — made her entrance early in the evening and was escorted to her throne.

After the dance, couples attended a midnight soiree in the Chase Hall Ball Room which was decorated as a "Castle in the Clouds," where they were served punch, cheese and crackers.

The Queen is escorted to her throne.

Bates students take a moment to relax during the dance, "Sleigh Ride to the Stars."

Carol Bishop

Anne Googins

Minda Hamelsky

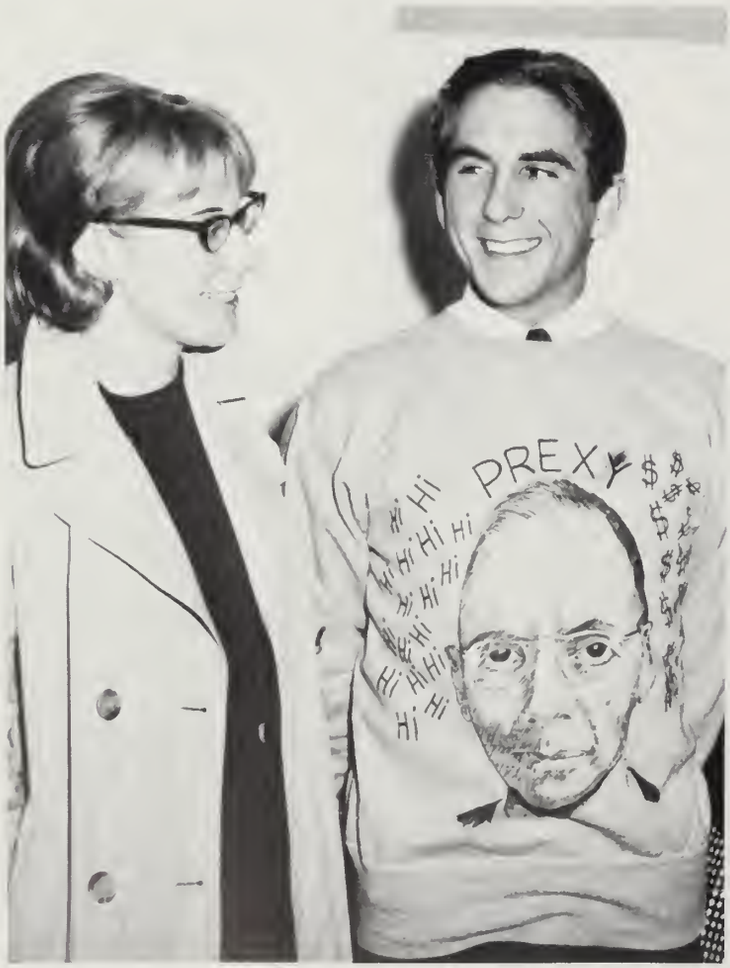
Karin Mueller

Judy Morris

The P.A. Board, Janet McEachern, Peter d'Errico, Cilla Bonney, Herb Mosher, President; Carol Francis, Secretary; Anne Ganley, Jim Fine, Andrea Buck, Irwin Flashman.

publishing association

Jan McEachern welcomes Peter Parsons to the Publishing Association, as Special Advisor to the President and Executive Member.



Probably one of the unique things about Bates is the way in which the publications throughout the campus are run. THE STUDENT, GARNET, and MIRROR are all under the fiscal control of the Publishing Association which has the largest budget of any campus organization. The P.A. board is made up of the managers, and members-at-large from the student body.

The advisors of each of the publications (Professors Nelson, Berkelman, and Walsh) are on the board, however, they do not have a franchise. Mrs. Campbell serves as the financial advisor to the board.

This year, after several years of office sharing, the P.A. acquired its own offices under Hathorn Hall. This not only serves as the center for all campus publications, but also allows for expanded facilities including a new dark room, more equipment and furniture.

The P.A. has continued to support the editors in their bid to present the campus with a clear picture of the campus, wider coverage, and good quality literary style and content.

Peter Reich. and Peter d'Errico discuss an article for the newspaper.

the bates student
voice of the campus

The BATES STUDENT began volume XCI in September '64 with a new high-quality paper and its old high-quality style. Having come to power just as the Auburn Free Press printed itself into bankruptcy, the new Editorial Board was baptized in the ink of the Pine Tree Press, printers of such other notorious publications as the Bursar's bills and the "blue slips."

The Big issue on and off campus was the 4/3 option and from there the entire educational outlook of the College. This "new educational opportunity" was the source of numerous major articles, and the subject of a continuing editorial broadside. The fledgling Student Senate came in for its share of knocks also, as it shakily tried its legs and took the first few steps toward maturity.

All this was in addition to the regular reportorial brilliance in news and feature articles. The paper was a full eight pages almost every Wednesday. An unforeseen rise in costs prohibited a permanent increase to ten pages, a factor which forced the unusually prolific staff writers to cramp their hands.

This academic year, the first in Bates' second century, marked a time of challenge for the College and for its newspaper: the College was working to plan its ideas for the future, and the BATES STUDENT was working to report and shape these ideas.

mirror

It was during the early months of spring in 1964, that the editors and staff began the task of putting together the materials, ideas, and pictures that were to come out as a finished product in June 1965. The editors collected their thoughts over the summer and returned last fall to continue their project. The yearbook was to involve many long hours of getting pictures, arranging the lay-outs, incorporating new ideas, and making use of the so-called "special effects." Only that which was considered "perfect" would be submitted to the publishers. The deadlines had a way of creeping up unexpectedly, and thus, the editors found themselves many a time working late into the night. However, the long hours spent, the worries over the present question: "Will we make the deadline," and the anxiety over pictures that weren't there, have been worth it. Hopefully this yearbook conveys to you, the theme of growth, modernization, and a look to the future here at Bates College.

Editorial Board of the Garnet: Laurel Booth, Andrea Peterson, Derek Hurst editor-in-chief. Not shown: Dave Williams and Gary Chamberlin.

garnet

Serving as an outlet for students with creative abilities, The GARNET publishes short stories, poetry, and drawings submitted by students and professors. The editorial board, headed by Derek Hurst, carefully selects those pieces for publication in the Winter and Spring editions which it considers most significant because of their style and content. In this manner not only are the artistic talents of the campus allowed to mature, but also the campus is made aware of them.

WRJR Board: Dan Clarke, David Lloyd. Middle: Bert Armington, Penney Gile. Bottom: Peter Heyel, Bruce Cooper.

wrjr

Bert Armington in the control room. "Now if you push this button the station blows up."

Security is having a secretary.

The radio station has grown both in quantity and quality over the past seven years. The broadcasting time has been increased this year so that WRJR-FM is on the air from 5:30 PM to 12 midnight Sunday through Friday. The Programming Committee has presented to the campus a well balanced selection of shows. These range from two hours of classical music every evening to such programs as The Jazz Spectrum and a Folk Hour with performances by Bates students. Horizons on Friday evenings has provided timely discussions with faculty members, students, and administration officials.

WRJR's news department of nineteen students has presented two ten minute news programs each evening. Sports and weather were also featured as a part of these programs.

The new mobile unit allowed WRJR to extend its programming potentialities. With this unit it was possible to report quickly and accurately the speech of Vice-President Humphrey when he spoke in Lewiston, as well as other special events.

Along with this, the record and tape library has been kept up to date with the newest recordings available. These improvements and others have continued to make WRJR-FM "The best in sound for miles around."

chase hall

dance committee

The Chase Hall Dance Committee, whose past responsibility was to provide Saturday Evening Dances, has become a committee of social-planning and coordination by opening new avenues of entertainment. These include open houses after plays, jazz and folk groups, as well as numerous dances. The committee, consisting of interested students, seeks to provide the campus with the new and varied entertainment.

Included among its responsibilities, the committee arranges two important dances, Back to Bates and Sadie Hawkins. Homecoming, always a gala occasion at Bates, provides an excellent opportunity for dancing as well as for greeting returning graduates. Sadie Hawkins provides a chance for each Bates girl to phone the Abner of her choice, invite him to a dance, but yet remain unknown to him until she picks her Abner up to take him to the dance. The evening is one of whirling square dancing and romance, provided by Marryin' Sam.

spanish club

Spanish Club *BACK ROW:* Bill Arata, Stephanie Young, David Foster, Anne Bogh. *FRONT ROW:* Joanne Campbell, Karen Smith, Ken Blank.

Karen Smith, Roy Horowitz, and Professor Garcelon listen as a member of the club talks about an accident in Guatemala.

Peter Reich relates some of his experiences during his junior year in France.

El Circulo Espanol consisted of a small number of students this year who met regularly to speak Spanish in the homes of professors. Professor Seward became chef extraordinaire at one meeting when he cooked an entire Mexican dinner for the members of the club. At other meetings the students learned folk dances of Spain and several Latin American countries. Primarily, the club provided an atmosphere that was more relaxed than the classroom, where students could speak Spanish.

french club

BACK ROW: Janette Smith, Mary-Jane Pugliese, Penny Cande. *MIDDLE ROW:* Terry Watson, Shirley Murphy. *FRONT ROW:* Nancy Long, Anne Bogh, Bambi Brown.

Each year a group of students who are interested in the French language and civilization get together to talk about their common interests in an informal atmosphere. This year, students who spent their junior year abroad presented some of their views on French student life and the character of the French people. French students, who were studying in local high schools for the year, were invited to spend an evening with the members of the club. Slides of France and Switzerland, as well as a movie, provided the substance for other meetings during the year.

The "Deutsches Verein" provides an opportunity for travelers, future junior year abroad students, and those interested in Austrian or German life to spend an evening together once a month. Meetings at Prof. Buschmann's home range from informal discussions and the exchanging of experiences to programs catering to individual interests — German opera and Lieder from Prof. Buschmann's collection, folk singing, and talks on modern German artists. The highlight of the year was a German "Weihnachtsfeier" complete with homemade Pfeffernüsse, Springle, and singing of German Christmas carols accompanied by Mrs. Buschmann on the piano.

Liz Frangedakis runs a freshman German Language laboratory.

lawrance chemical society

The Lawrance Chemical Society, named after Dr. Walter A. Lawrance, was begun in 1931. Its primary objective is the stimulation of interest in the field of chemistry as well as to afford members a broad outlook into the field. To achieve this, the Society organizes delegations to professional conferences, manages science fairs and features speakers involved in chemical careers as industrial, and research chemistry. From time to time, students or faculty members give informal lectures.

Dr. Lawrance checks equipment at the Science Fair.

Organization members listen to a speaker at a monthly meeting.

Students prepare lab.

Charles Leadbetter and John Noseworthy demonstrate to visitors.

Skip Vollans explains the mechanics of a planetarium.

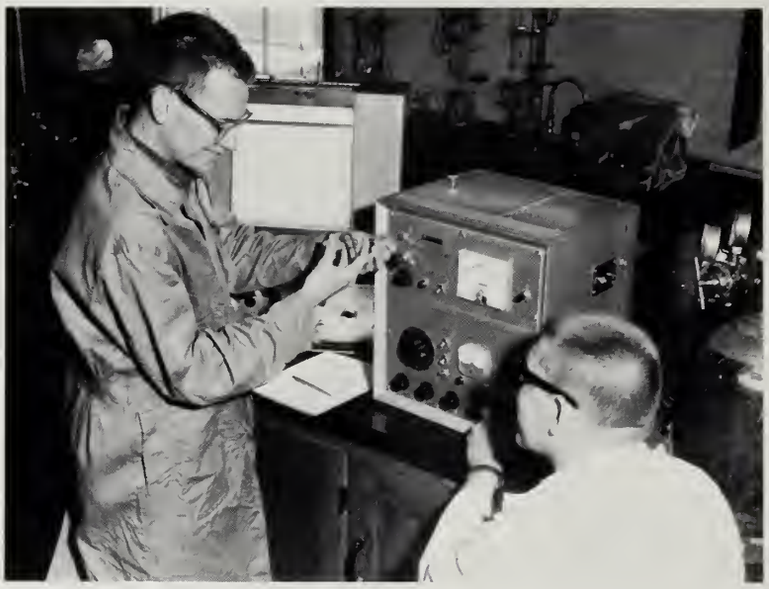
jordan ramsdell

Biology, geology, physics and mathematics majors compose the membership of the "Jordan Ramsdell Scientific Society." The purpose of the organization, "to promote interest in science, to inspire the spirit of research, to increase the scope of college instruction," is carried out in its variety of programs. These include lectures in any one of the fields represented, as well as the annual science fair. All programs reflect the varied interests of the students and are aimed toward a level of common understanding among all sciences. At the end of the year, a lobster cookout is held at Reid State Park, to add an enjoyable climax. To this honorary organization, new members are chosen from junior and sophomore majors.

FIRST ROW: Pauline Grimmeisen, Donna Dahlquist, Karin Mueller, Frances Fairley, Alice Kaplan, Irwin Flashman. *SECOND ROW:* Gene Safir, Susan Huiskamp, Bradford Wyman, John Noseworthy, Jr., president, Lyn Avery, secretary, Curtis Talbot, Jean Hager. *THIRD ROW:* Douglas Macko, Arthur Amend, Carol Bishop, Newton Clark, Abigail Palmer, Philip Daoust, Janet Soltis, Steven Quattropani, H. Jackson Merchant. *FOURTH ROW:* Laurence Brown, Daniel Clarke, William J. Driscoll, Thomas Fox, Steven Edwards, absent, Anthony Di'Angelis, vice-president.

science fair 1964

Dick Pfirman and Curtis Talbot watch as a model geyser goes up in a geology display.



Cliff Baker and Bob Halliday arrange apparatus for a chemistry experiment.

Dave Piasecki, Nancy Nichols, and Peggy Grimmeisen set up slides on a phase-contrast microscope.

During March, the Jordan-Ramsdell Scientific Society and the Lawrance Chemical Society presented an exhibition displaying student work. The exhibition was open to the public, and as many as 2,500 people attended. Students from each department made exhibits to illustrate the various techniques and subjects they had studied. Several seniors presented lectures on their thesis topics, while others illustrated clinical, biological, and chemical procedures.

Several highlights presented in the Carnegie Science Building included planitarium lectures, a geyser illustrating the geology behind "Old Faithful," a study of the development of the chick embryo, and illustrations of electrical, optical, and magnetic principles. In the field of chemistry numerous phases of the science were exhibited. Students illustrated crystal growth, chemical analysis, and the use of chemistry in nutrition.

The purpose of the Science Fair was to give the public some insights into the type of work being done by Bates students and some of the problems and principles involved in the work.

Ken Blank, Seppo Lehto and Carl Johnson look on as Martin Flashman begins to move against his brother Irwin.

chess club

Though such names as Lasker, Fisher, and Horowitz are far from becoming household words, interest in these and other names has risen this year on the Bates Campus. These names mean to chess what Mickey Mantle and Jimmy Brown do to baseball and football. Also, like these more athletic games, chess has several different types of participants: novices who barely know all the rules; people who have mastered some of the technical aspects of the theory of the game; and finally the experts who have come near to perfection of their game. The Chess Club has helped to give people of whatever stage a chance to improve their game by having regular games in the Chase Hall Lounge. The more skilled have become part of a team that entered intercollegiate competition with Colby College and Norwich University. Both Harvey Bernard and Gary Chamberlain have worked hard to help the club on its way.

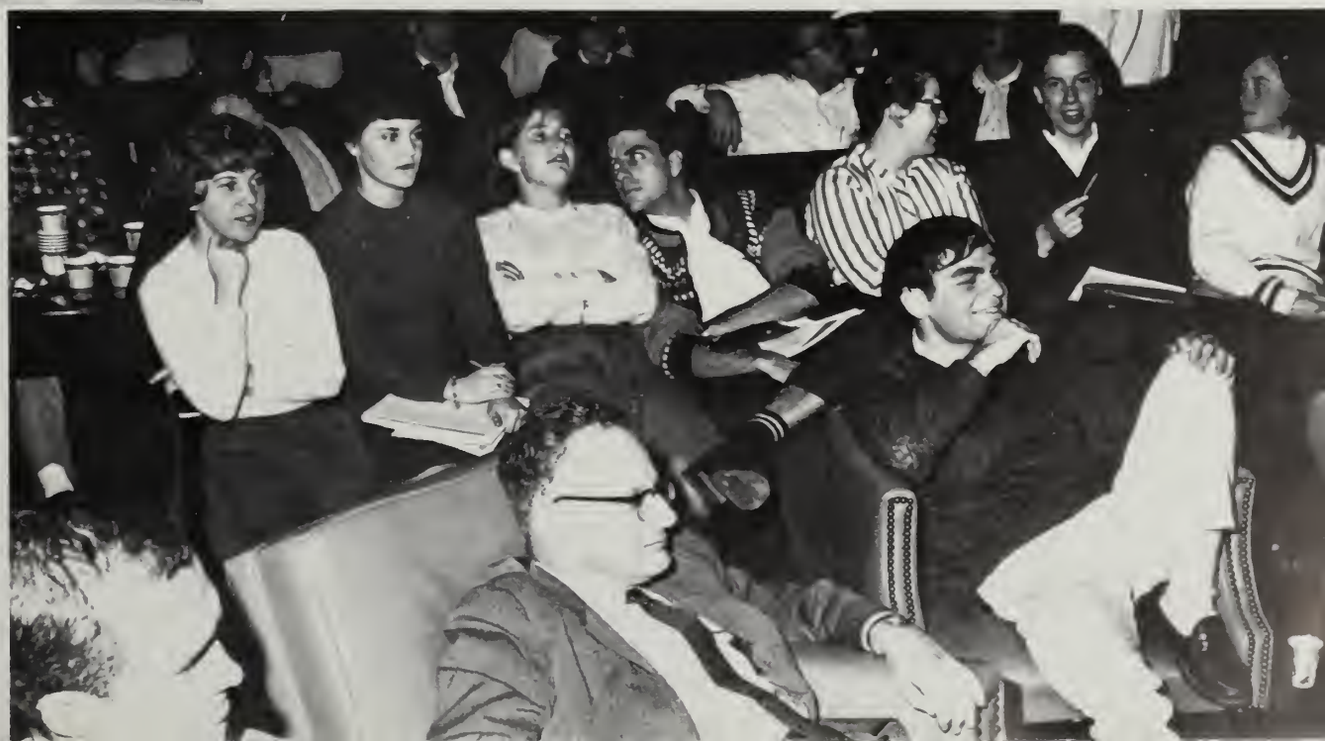
Student Senate holding a mock election.

Lewistonites and Bates students listening to Humphrey's speech.

When we arrived at Bates this September, the excitement and enthusiasm of the national campaigns began to spread throughout the campus. Brad Anderson, President of the Young Democrats and Dave Williams, President of the Young Republicans began to organize their respective groups to work for the local candidates as well as the presidential nominees. Soon, most of the campus was caught up in the active campaigning.

Dr. Thumm, conducting a course in Political Process, encouraged student participation in the election as the real way to understand our electoral system. Bates students conducted a door to door canvass distributing literature. Others conducted a telephoning program, or volunteered to drive voters to the polls on election day.

In spite of the rainy night, there was a large student turn out to see Hubert Humphrey, the Vice Presidential candidate, make a speech at the Lewiston commons. Throughout the dorms, students were busily filling out their absentee ballots before the deadline. The Student Senate conducted a mock election in lower Chase Hall in which President Lyndon Johnson defeated Senator Barry Goldwater. The climax of all of the efforts was election night. The college placed a television in Chase Hall Lounge so that the anxious co-eds could listen to the election night returns.



Dr. Thumm and students listen to election night returns in Chase Hall.

Some contemplative barristers, Peter Weatherbee, Chip DeLisi, Andrea Buck, David Williams, Marshall Snow, and Cliff Goodall.

barristers

A career in law is the common goal of the members of this group. It is a loosely organized club meeting between four and six times a year to discuss goals and graduate work. As this club is mainly a channel of communication, speakers are brought to these meetings to impart some of their professional knowledge. This year Peter Winogad, Assistant Director of Colombia Law School, Assistant Dean Kendall of Boston University Law School and Assistant Professor John Huston from Syracuse have spoken.

Is that so? as Richard Rosenblatt looks over Michael Beloff's shoulder during the Oxford-Bates debate.

delta sigma rho

Two members of Delta Sigma Rho, Jeffrey Rouault and Richard Rosenblatt.

debate council

Lou Balk and Jim Filakosky joke while waiting for a debate to begin.

Delta Sigma Rho is the honorary society for debating. It recently combined with Tau Kappa Alpha to form a truly national organization. Each year a convention is held to discuss debating techniques and procedures. Membership, open to juniors and seniors, is of course, a privilege and members remain active long after graduation. The Bates chapter was established in 1915 and this year marks the fiftieth anniversary. The present under-graduate members are Jeffrey Rouault '65 and Richard Rosenblatt '66.

Professor Quimby (also a member of Delta Sigma Rho) has concentrated this year on developing two-man teams in the novice squads. At the practice debates and in competition at Tufts and Harvard, they have shown a high degree of ability and good potential. Four teams were sent to the Easterns and the Nationals, where they maintained the high standard for which Bates debaters have been known.

Bill Norris begins research on a debate topic in the debating room.

psychology club

Because it is increasingly evident that contemporary approaches to psychology will modify the nature and role of psychological personnel, the Psychology Club seeks to inform and guide students entering the field. In mental health, teaching, research, industry, guidance, testing and many other related fields the psychologist is extending his knowledge and assistance. He is altering traditional theories in all these fields, constantly changing and improving them. It is the purpose of this club to stimulate a scientific curiosity in the field, hoping to pave the way for future professional goal attainment.

student education association

SEATED: William Paris, Elizabeth Frangedakis, David Zuretti, president; Carol Reed, Martha Ryan, Sharon Fisher. *STANDING:* Ronald Snell, Pauline Spence.

Serving particularly those students expecting to enter elementary and secondary school service, the Bates Student Education Association seeks to provide enriching undergraduate experiences, outside the classroom, which will be meaningful and worthwhile for future teachers. Various activities featured by the club include discussion of issues and new trends in education, presented by prominent educational figures as well as trips to institutions of interest. In addition the club maintains affiliation with similar state and national educational associations. Through these various memberships, Bates students may participate in state and regional educational conventions.

history club

The History Club, composed of interested history students and majors, provides a casual study and analysis of history. Because of the club's liberal orientation toward history, programs for the meetings are quite varied in content. They range from military music to silent movies on the Puritans and Columbus. Guest speakers are often presented, generally adding an international flavor through their accounts of history or custom. Two highlights of the club's activities include an annual Christmas party and steak banquet, which help to combine historical and social interests.

SEATED: Stephen Adams, Linda Glazer, Brian Deevey, president; Cilla Bonney, Norman Davis. *STANDING:* Russell Wagenfeld, Ronald Snell, treasurer; Thomas Henderson. Absent, Lyn Melander, secretary; William Gosling.

sociology club

The Myhrman Club, whose purpose is promoting interest in sociology through discussion, field trips, and lectures, presents a wide range of informative entertainment. Lectures on job opportunities, on religion in the community and on the future changes in the field of social work provide new outlooks on the student's future possibilities in the field of social science. Panel discussions by Junior Year Abroad students and by students from foreign lands give added insight into the attitudes and customs of the present generation in other countries.

SEATED: Janet McEachern, Martha Sander, Linda Reisner, Carol Brown, Deborah Zaki, president. *STANDING:* John Wilska, Sharon Fisher.

arts

FIRST ROW: Suzanne Johnson, Curt Talbot, Nancy Frey, Art Amend, Lyn Brown. *SECOND ROW:* Lionel Whiston, Abby Palmer, Ned Brooks, Ann Rodgers, Larry Brown.

robinson players

Success has followed the name of the Robinson Players during its twenty-six years of existence. It is not easy to keep a name as well polished as has this group. The reasons are many, but two stand out in importance. The first is the time and effort put into the performances by the students. The second reason concerns the "brains" behind the outfit, Professor Lavinia M. Schaeffer. Professor Schaeffer's "family," as the group is often called, can be found in the Little Theatre months before the final performance. Committee members are recruited from all over the campus to deal with make-up, sets, lighting, publicity and costumes.

The three performances of the 1964-1965 season are Sophocles' *Antigone*, Ionesco's *Rhinoceros* and a "Shakespeare Special." Although the plays produced by this group are the major undertakings, the Rob Players provides the campus with a series of movies throughout the year. For all those interested in theatre arts, Robinson Players provides a close-knit and instructive group.

Before a production can meet the stage, a great deal of work behind-the-scenes must take place. The make-up committee takes care of one such job, in a fun-manner.

Kathy Kelley's tailor-made costume is given the final touches.

John Seavey checks lights before a performance.

ON FLOOR: Art Amend, Ned Brooks, President; Harry Seigel. *FIRST ROW:* Al Armington, Suzanne Johnson, Sara Schenck, Sharon Templeman, Sue Ladd, Abby Palmer, Jeff Raff. *THIRD ROW:* Ken Child, Pat Davis, Donna Polhalmus, Nancy Frey, Chris Davis, Ann Rodgers, Lyn Brown, Larry Lindblom. *FOURTH ROW:* Larry Melander, Bob Cornell, Lionel Whiston, Marty Flashman, Larry Brown, Curt Talbot, Dave Reise.

" 'Good Morrow' " to the King!

henry v

The Robinson Players Centennial Play Production, *Henry V*, met with great applause in the Spring of 1964. A brilliant success, this production involved months of concentrated study and behind-the-scenes work. The costume committee stopped at nothing to turn out their elaborate Elizabethan fashions.

The "Ladies in Waiting" dress the lovely Princes "Kate."

The friends of Falstaff mourn his death.

Bonnie Mesinger playing the role of Ismene listens sympathetically to Suzanne Johnson, Antigone.

Larry Brown as Creon mourns the death of his son, Jeff Raff, as Haemon.

antigone

Antigone, one of the Great Greek tragedies, was produced by the Robinson Players during the Winter of 1965. The theme of the play, "For mortals greatly to live is greatly to suffer" lead both audience and cast to a state of reflection. Chorus members were taught basic techniques of coordination in movement under the direction of Professor Schaeffer and Shirley Templeman. All cast members learned to look like Greek statues. The most prominent Greek statues were:
Suzanne Johnson '67 as Antigone
Bonnie Mesinger '66 as Ismene
Larry Brown '66 as Creon
Jeff Raff '68 as Haemon.

"With Thyiads revelling" the Chorus raises a prayer to Iacchus.

STANDING: Lorraine Karcz, Brian Deevy, Anne Sevin. *SEATED:* Steve Adams. All are members of the Art Association.

art association

Each year during Spring Weekend, the Art Association gathers together an outdoor exhibit featuring paintings and sculptures of artists from Maine schools and the Lewiston-Auburn area. Also, in past years the Association fostered the artistic growth of students who were interested by providing materials and constructive criticism. By its very presence, it helped to make it possible for the college to introduce several art courses including an artists' workshop. The Association is still viable, but it has yielded some of its activities to the newly created department. It is expected that in the next few years even greater interest in the student body will develop because of the presence of Professor Mitchell and his courses.

Annual Art exhibit during Spring Weekend.

Samuel Withers, curator of the Treat Gallery, displays some prints at a special exhibit.

Professor Mitchell points out an amusing detail as Kelly House, Bill Davis, Elouise Panton and Janet McEachern look on. *IN THE BACKGROUND* is Penny Brown. *TO THE RIGHT* is Sarah Myers.

united nations of poetry

Mount David has long been the scene of many activities. During the past few years, students have made the short pilgrimage to the summit to read some of their own poetry and to listen. Professors Tagliabue and Chute have also contributed some of their efforts to the sessions. The foreign students have done some of the traditional dances of their countries, as well as read and acted out some of the Haiku poetry of Japan.

It has been the custom for students to make contributions to UNICEF, which is an agency of the United Nations dedicated to helping children throughout the world. This year the U.N. of Poetry has done some work aimed at collecting money to be used to rebuild a school in the South. This school was destroyed by fire in the summer of 1964 in Mississippi.

Professors and students on Mount David read their own poetry as the afternoon passes into evening.

chapel choir and choral society

View of the Bates Chapel.

In the fall of 1964, the Bates Chapel Choir accepted the challenge presented by *The Requiem* of Johannes Brahms. This beautiful and difficult work demanded a great deal of time, energy and enthusiasm — and the some thirty men and women in the choir gave it their all. On Sunday evening, November 22, *The Requiem* was performed in the Chapel — a moving experience for participant and listener alike.

In addition to religious music during Wednesday morning chapels, the Choir has sung at Bowdoin and plans a television performance. The Choir's recording of Benjamin Britten's *Ceremony of Carols* was sold prior to the Christmas season.

The Choral Society has had an unusually active year, beginning with a concert in October, which included selections from Bach's "Holy is God" and Ralph Vaughn William's "Old Hundredth Psalm." In December the group presented a beautiful Christmas program, featuring Vivaldi's "Gloria" and Louie L. White's "Rejoice, Emmanual Shall Come." Pops Concert in April, always the highlight of the spring season for Lewiston Socialites, concluded the Society's busy and most successful year.

The Meris in front of the Unisphere at the World's Fair.

merimanders

. . . Walking with poise onto a plane headed for New York, piling into a car and barrelling down the Maine Turnpike to Wentworth-by-the-Sea, or slowly drifting over to the Alumni Gym for the Back to Bates Dance, always singing en route. . . . These are the Merimanders as they represent the College wherever they go. Their voices have joined to bring enjoyment not only to the Bates Campus, but to many others as well. For example, television viewers remember the Meris as they appeared on the Portland and Poland Springs stations. . . . Karen Cunningham, the basso-profundo, leads the seven-membered group. . . . Their melodies are diverse, ranging from show tunes, modern close harmony, to spirituals and folk music to which they are often accompanied by one of their members on her guitar.

Carol Johnson, Myra Treash, Karen Cunningham, Penny Brown, Carol Bishop, Marilyn Osgood, Janet McEachern.

The Deansmen: Ted Hall. Ralph Day. Peter Oakes. John Pedrick. Edward Foster. Harry Marsden. Elwood Trask. Robert Thompson.

deansmen

Blend . . . sophistication . . . and style . . . these are key words that may be used to describe the sounds of the Deansmen. Peter Oakes, heading the octet, speaks of the purpose of the group as two-fold: first of all, to entertain others, and secondly, to find personal enjoyment in singing.

The Deansmen have a busy social calendar throughout the year. Along with school functions such as IMUR, the first dance of the year to greet the freshmen, and the annual Homecoming Dance, the Deansmen travel to many other parts of New England to sing.

Perhaps one of the most exciting singing engagements that the Deansmen have had in recent years was that of accompanying the Merimanders to the World's Fair last June, where both groups performed at the New England Pavilion.

The Deansmen at the World's Fair, June 1964.

A typical rehearsal scene of the Deansmen.

Bob Bekoff, Pete Pequignot, and Nick Basbanes prepare for a comprehensive Cultural Heritage examination.

off-campus men

Leon Hurwitz decided to go Bohemian in his new found off-campus home.

Wes Fiore enjoys advantages of off-campus life.

Peter Parsons and Peter Reich relax during a quiet evening at home.

The off campus organizations were established many years ago to assimilate into campus life students who lived in the Lewiston-Auburn area. In the 1940's there was even a group of off campus women who formed a sorority called Lamda Alpha. This association was dissolved, however, during the early fifties and the women became affiliated with separate dormitories.

The composition of the Off Campus Men has been altered somewhat in recent years. Because of the limited space in the dormitories. some juniors and seniors were allowed to live off campus. They now make up the majority of off campus men. as opposed to the men who are natives of Lewiston-Auburn. Now, it seems that the reasons for the off campus men's existence have also changed. Seniors. especially after three years. tire of dormitory life and thirst for the freedom of an apartment of their own. To them an off campus residence means spacious living quarters. quiet when they want it. comfortable furniture. perhaps a stove and a refrigerator. and no lines in the bathroom.

Off campus apartments include the Colonial House. a late Victorian establishment on Main Street. several professor's homes. and various apartments in the downtown area. All are within a few minutes of the campus. The Off Campus Men's Organization has its own officers and a meeting room in lower Chase Hall. Because of the nature of their informal setting. off campus apartments have become one of the centers for folksinging and spontaneous gatherings.

This year is possibly the last year that the glorious life of the off campus apartments will exist at Bates College. With an incease of available space in the college dormitories and more students taking their junior year abroad. it seems there will no longer be any need in the eyes of the administration for off campus apartments to exist.

Steve Adams. Herb Mosher. Peter d'Errico. Cliff Goodall and Brian Deevey prepare to cook their evening meal from the Off-Campus Man's Cook Book.

foo

The 1964 Bobcat-eleven finished with a 3-5 season. Although failing to break even, Coach Hatch witnessed one of the better football efforts at Bates. Three of the five losses were by one touchdown or less.

In the opener at St. Lawrence, the Bobcats took an early lead only to lose in the second half 15-8. Senior end Grant Farquhar stood out both on offense and defense and was given a berth on the Larrie's All-Opponent team.

The following week, at home, Bates lost 21-0 to a strong Norwich University team.

On the road again, the Bobcats came from behind in the last minute of play to beat Trinity 14-7. In that game, Junior halfback John Yuskis was selected as E.C.A.C. back of the week.

Tom Carr scored both touchdowns the next week in a 12-0 victory over Worcester Tech. which set the record at 2-2.

Homecoming fans saw Bates lose a heartbreaker to Middlebury 15-12. Bobcat touchdowns were by Yuskis and Carr.

The final Bates-Maine State Series contest, a rivalry that has existed since 1893, was held at Orono.

all

The Bobcats drew first blood, scoring on a Yuskis off-tackle run. But the powerful University of Maine rolled on to a 38-7 win in a game that was televised in northern New England.

Bates was at home the following week to take on Bowdoin. In a game that the *Portland Press* called one of the hardest hitting State-Series contests ever, the Bowdies edged the Bobcats 13-6.

Colby fell for the first time in eight years, to climax the Bobcat season. Yuskis and Carr had touchdowns, while soccer recruit Bob Thompson kicked two extra points and the first Bates field goal in nine years in a decisive 23-6 win. Sophomore guard Gerry Ireland was placed on the E.C.A.C. team of the week.

All-Maine honors went to Carr and Yuskis on offensive and Farquhar on defense.

Al Goddard was at the football banquet for the first time to present the Goddard Achievement Award. Recipients were Farquhar and Yuskis.

Next year, Bates will lose nine lettermen through graduation. Sixteen lettermen are returning though, providing a strong nucleus at all positions. Jim Brown and John Yuskis are co-captains.

Gaylord Farquhar beats a Colby defender to a MacNevin pass.

FIRST ROW: George Beebe, Bob Thompson, John Recchia, John Zander, Bruce Peterson, Chris Mossberg, Captain Bob Lanz, Ed Wells, Bob Kramer, Mark Hennessey, Ted Foster, Lee Sweezey, Wyland Leadbetter. *SECOND ROW:* Ali Hersey, Bob Houlihan, Ken Burgess, Dutch Boyer, Al Bemis, Chris Abernathy, Steve Johansson, Tom Adams, Manager, Woody Trask; Coach, Roy Sigler. *THIRD ROW:* Buff Boger, Kelly House, John Donovan, John Van den Bosch, David Dow, John Nims, Bill Guthman. Missing — Jon Jewett, Frank Kirembu.

soccer

Coach Roy Sigler's well disciplined soccer team compiled a fine record, although they fell one game short of an undefeated season. Bates relied on strong defense to hold opponents to eight goals, while posting five shutouts. In the net for the Bobcats was Ted Foster, who in his first year, demonstrated outstanding ability as a goalie. Lee Swezey and Bob Thompson at fullback positions, played significant roles in the superb Bates defense. Halfbacks Bob Kramer, George Beebe, and Mark Hennessey not only completed the defensive unit, but also were instrumental in the offensive attack. The forwards were Bruce Peterson, Frank Kirembu, Bob Lanz, Ed Wells, Steve Johannson, John Recchia, and Chris Mosberg. The alternation of this forward line demonstrated the depth of the offense. Others essential to the winning squad included senior Al Bemiss, and juniors Bob Houlihan and John Zander.

Captain Bob Lanz dribbles through two defenders.

Frank Kirembu lines up for another beautiful kick.

Mark Hennessey hitchkicks the ball out of trouble.

Bruce Peterson getting ready to set up another fine pass to Frank Kirembu.

The increasing popularity of soccer as a spectator sport was evident this year with the tremendous and enthusiastic attendance at home games. Captain Bob Lanz in his four years contributed greatly to this development from a club to an exciting varsity sport. In addition to these leadership qualities, Captain Lanz was essential to the scoring threat of the Bobcats.

Most exciting and crucial to the 1965 season were the two Colby games. After losing 2-1 at Waterville, the Maine State Series title rested on the remaining game with Colby. In this contest on Garcelon field. Frank Kirembu scored on a beautiful assist from Bob Lanz. Although Bates dominated play throughout the game, the Mules scored a tie on a penalty kick.

Other highlights of the season were a victory over Brandeis, televised on Channel 10, and two exciting wins over Bowdoin. The spirit of the second Bowdoin contest was captured by Coach Roy Sigler, who watched the final minutes of the game enjoying a huge lollipop.

Bruce Peterson, Bob Lanz, Bob Thompson, Frank Kirembu, and George Beebe made first team All Maine. Ted Foster and Bob Kramer were selected to the second team. Peterson and Thompson also received All New England honors. The achievements of these individuals were indicative of this very successful 1964 season.

Halfback Bob Kramer puts his left foot to use to get the Bobcats out of trouble.

Center Halfback George Beebe hustling after the ball as usual to clear it out of trouble.

Ted Foster makes another fine save with the aid of John Zander.

Captain Trufant and Bob Plumb duel in a close final sprint.

cross-country

Bates' cross-country team was confronted with several interesting changes this season. Walt Slovenski, teaching track in Mexico, was replaced by Steve Ross, Lewiston High School coach, and Athletic Director Lloyd Lux took the reins; construction caused a change of course; and loss of Karl McKusick due to a foot injury, meant a new tone in season's results.

Undaunted, Captain Ken Trufant proved "variety is the spice . . ." as he led the team to a respectable 2-5 season. With depth a problem, regulars Basil Richardson and John Baldwin welcomed the addition of smooth-running Jay Sweeney and freshmen Harry Mahar and Bob Plumb. Plumb sparked the team, setting two course records against Bowdoin and St. Anselm's.

Shortly after losing to Boston University, by three points, the Bobcats surprised Bowdoin, 17-14, while Plumb set a new home course school record. Trufant, Richardson, and Sweeney completed the near-sweep.

The finest performance occurred in the last meet — a shutout at St. Anselm's. Trufant, Plumb, and Sweeney paced the field to a St. Anselm's course record while Basil Richardson tied the mark. Well-deserved victories as these make a season worthwhile.

majorettes and band

KNEELING: J. Johnson, L. Morse, M. Pughesi, I. Earn, K. Mueller, *STANDING:* Head Majorette, Joyce Mantylla.

Joyce marches again.

Changing of the guard, Bates style, with Bill Gosling out front.

Strutting across the first dry season of Bates football in years, the majorettes, accompanying the lively Bates band, brought a touch of color and spirit to the fall sports scene. Bringing their musical talent to rallies, games, and send-offs, the band performed their fight songs for the enthusiastic Bates fans. Twirling and marching to these songs were the majorettes. Working together with the band, they formed a part of the formations on the football field during the half-time shows. This year, during the Maine game, Bates students had the opportunity to see the majorettes twirl on television.

Over the tops of the heads of the shouting fans at any football, soccer, or basketball game, you can see the Bates cheerleaders leading the crowd. Working with a squad of seven regulars and two alternates, this year the cheerleaders managed to create a set of new cheers which include tricky moves never seen before at Bates. Because of their efforts, increased fun and good sportsmanship were evident in the fans. Hard work and creative ability have assured the cheerleaders of maintaining their active and lively role on the Bates sports scene.

ROW 1: Prudy Grant, Aija Ronis, Chris Hager, Betsy Hervie, Jay Wells. *ROW 2:* Bruce Stanton, Bruce Lyman, Ardith Austin, Mary Ingraham, Ellyn Winters. *ROW 3:* Bill Gosling, Charlie Wall, Barb Johnson, Karen Grant, Ann Sevin, Jim Downing.

basketball

The arrival of Kjell Rannelid and Howie Alexander this fall turned out to be quite fortuitous for the Garnet hoop squad. Kjell, a rangy six foot eight inch center, came from Sweden, providing needed height. Alexander, with speed and uncanny passing ability, was an effective addition to the back court. Together, these two Frosh contributed to Bates first winning season in four years.

One of the highlights of the season came on February 19, when Co-Captain Seth Cummings scored his thousandth point against Tufts as he sparked the Cats to an 81-73 victory.

Much of the credit for this year's success went to Co-Captain Don Beaudry, who, despite an early season seige of pneumonia, provided leadership and steady ball handling on the court. Ted Kryzynowek and Bob Mischler added strength to a fast-breaking and pressing backcourt.

The Cats rolled through their first five games including a come from behind thriller against Colby, sparked by Bill Beisswanger's eight markers near the buzzer. After losing two games on their first trip to New York in twelve years, the Bobcats returned home to absorb a 120-76 shellacking at the hands of the Black Bears from Maine. Recovering from this defeat, the Peckmen, led by Cummings, 37 points, overpowered a highly rated Springfield team.

After extending their winning streak to three, the squad lost to Assumption, then first in New England, and a strong Williams quintet. The inability to control the boards and numerous bad breaks proved decisive in these losses.

The Cats were not able to attain momemtum during February. While defeating WPI and the Coast Guard, they suffered disappointing losses to Wesleyan and Northeastern. In the second Maine game, a stall surprised the Black Bears, but conversion of several Garnet miscues gave Maine a 54-41 victory.

Two thrillers marked the last two weeks of the season. Alexander's two free throws with sixteen seconds left gave Bates a 68-67 victory over Colby. Howie again appeared the hero at Bowdoin with his tap in the last five seconds tying the game. A last second shot from twenty five feet by Danny Tolpin gave Bowdoin the game.

The return of high scoring Bill Beisswanger, Howard Alexander, Bob Mischler, John Wyman, Ken Lynch as well as several promising Jayvees should provide the Garnet with another successful season.

Tap off starts action against Wesleyan.

"Is there an extra seat up here?"

Kjell makes successful debut against St. Anselms.

Cummings goes to work against Maine.

winter track

Although the 1965 track team lacked the depth of former years, it produced a number of standout performers. The seniors, Captain Al Harvie, Bob Kramer, Harry Mossman, Ted Davis and Tom Bowditch, gave excellent accounts of themselves. For the fourth straight year, these boys were part of a winning track team.

Coaches Robert Hatch and Roy Sigler did a commendable job in the absence of Walt Slovenski. Coach Slovenski spent his sabbatical in Mexico training their Olympic team.

There were three new teams on the schedule; Holy Cross, University of Massachusetts, and Rhode Island. Although Bates lost two of these three meets, they turned in outstanding performances against Holy Cross and upset the strong contingent from the University of Massachusetts.

Al Harvie did an excellent job both as a team leader and as a hurdling standout. In addition, Wayne Pangburn has worked to establish himself among the best hammer throwers in the New England region.

Having completed the indoor competition, these same individuals prepared to move from the Cage to Garcelon field for Spring activities. Judging from the individual achievements of the 1965 Winter team, continued success can be expected.

Metz, D. Eagleson, T. Davis. Missing: K. Harvie, J. Makowsky.

Tom Bowditch clears the bar in another fine jump.

Jay Sweeney takes lead in the 1000 against Colby.

Allen Harvie, leading the pack, followed closely by Keith Harvie, Jon Jewett, and Gary Chamberlain.

Glen Pierce, consistent in the 600 all season, leads on the straightaway, followed by Stuart Anderson.

Bob Plumb strides ahead in the mile.

Harry Mossman starts his spin.

Chris Mossberg clears the bar with little to spare.

Paul Manganello wins the 45 yd. dash followed closely by Jon Jewett.

expanded intramural program

The Intramural Council. *SEATED:* Dave Cox, "Commissioner" Jim Fine, Gordon McKinney, Jack Merchant. *STANDING:* Bill MacNevin, Steve Burlingame, Bob Thompson, Bill Goodlatte, Jim Easton, and Ron Vance.

The vast majority of Bates men participate in the intramural program during their college years. The various activities which include fall, winter and spring sports are co-ordinated by an august body known as the Intramural Council. The seasonal meetings were often characterized by spirited discussions between Bill MacNevin and the rest of the council members concerning the proper league for Smith Middle teams.

One of the incentives for winning in intramural competition has been the point system, which awards greatest credit to the best teams in each sport. This season, 1963-64 champion John Bertram found itself in a close battle with Roger Williams.

Working with Athletic Director Lloyd Lux on the intramural program were Jim Fine and Dave Cox. Arranging schedules, directing activities, finding referees, and keeping standings and statistics were among their duties.

The first annual Intramural Sports Banquet was held in May, even further increasing the value of this most essential aspect of college life.

fall

football

Touch football started the year's activities. Ron Vance, an active intramural standout in all sports, served as quarterback to lead John Bertram Hall to the championship of the A League. He often found targets in Al Harvie and Paul Savello in posting crucial wins during the season. In the B League, Bernie Revior led East Parker to the crown with four touchdown passes. Greg Egner also contributed to the success of their season. Smith North was victorious in the C League.

This year saw such regulars as Bob Blagg, Bob Bekoff and Sam Aloisi close out their intramural careers on the fields behind J.B.

Peter Weatherbee gets set to throw downfield picking up blocks from Tom Bowditch and Bill Brunot.

Ralph Whittum breaks away from Paul Savello in Smith Middle J.B. game.

winter

volleyball

The snow flew, and the intramural program moved to the "Little Gym" for volleyball competition. John Bertram captured the A League, led by the spiking of Bob Thompson and Bob Blagg. In the C League, East Parker reigned.

Roger Bill after winning the B League defeated the J.B. squad. Tom McKittrick and Randy Bales contributed to the upset of the J.B. champions.

The faculty made its first appearance. Sparked by Professor Buschman and Dean Boyce, their squad gave many A League teams a challenging afternoon.

John Achenbach looks on as a teammate reaches high to spike.

basketball

Action began in early December in basketball. The A League witnessed a close struggle between Smith Middle, John Bertram and Roger Williams. The 1963-64 champions of the A League Smith Middle displayed good shooting and rebounding, especially by Steve Ritter again in action. The lack of depth on J.B.'s team, and Roger Bill's slow start allowed the Middies to capture the 1964-1965 title. Although failing to win a game, the Smith South team provided spirited competition throughout the season.

In the B Leagues, Smith North and Smith Middle dominated, while Smith Middle also finished first in the C League.

On February 19, an Intramural All-Star team consisting of the best players from each dorm met the talented Jayvees. The All-Stars sparked by the fine play of Tom Mckittrick and Lee Tamis were overcome 80-53 after a very strong first half.

Bruce Winslow taps one in for the All-Stars as Jeff Barclay reaches in vain to block the shot.

Lee Tamis pops from outside in the All-Star-J.V. game.

Hockey Club Members: *FIRST ROW:* John Lund, Jim Brown, Jim Wilska, Lee Sweezey, Paul Bertocci. *SECOND ROW:* Dave Lloyd, Mike Carr, Art Valliere, Russ Wagenfeld, Dennis Fortier. *THIRD ROW:* Bob Houlihan, Bill Barnes, Dave Burt.

hockey

After three years of floundering, the hockey club was finally officially organized this year. The club, open to all interested men, competed in the Northern Maine Amateur League, and played outside teams including Hebron Academy and St. Francis.

The club's funds were provided by the members themselves who were generously helped by the Student Senate, the Proctor's Council, and the Outing Club.

Although the club did not have an outstanding record in league competition, a very significant start has been made and hopefully this program will be established as a permanent part of the intramural program.

tournaments

Handball is another intramural activity, which is organized in tournaments of singles and doubles competition. Lee Sweezey was last year's singles champion.

A squash tournament was set up by Dave Cox for the first time this year and has met with considerable success. "Gaylord" Farquhar was outstanding in squash competition.

Bowling was held at the Holiday Lanes at minimal cost to competitors.

The Chase Hall tournaments included pool, billiards and ping pong. Walt Lasher was pool champion while his brother "Chuckles" received billiard honors. Gene Safir was outstanding in ping pong.

track

The annual track and field meet was changed this year from its winter date. Usually held in the "Cage," the meet was postponed until spring when it could be held out of doors on Garcelon Field. J.B. held the track title.

softball

Softball, one of the most popular intramurals sports, concludes the list of activities. Sounds of excited players and spectators can be heard almost any spring evening from Garcelon Field. Last season J.B. won the A League while West Parker dominated the B League.

Dale Philippi singles to left in intramural softball action.

spring

Doug Dobson speeds to first.

FRONT ROW: John Yuskis, Bill MacNevin, Ted Krzynowek, Randy Bales, Gary Lia, Captain Paul Holt, Dave Parmelee, Al Cruikshank, Dave Olsen, Greg Egner. *SECOND ROW:* Coach Chick Leahey, Lee Swezey, Art Agnos, Tom Carr, Dick Crocker, Ralph Whittum, Ted Foster, Bob Bowden, Manager Richard Rosenblatt.

bobcats finish 8-5

The 1964 Bobcat Nine compiled an over-all record of eight wins and five losses. In State Series competition, Bates was second to Colby, with three wins and three losses. Infielder John Yuskis and pitcher Ted Krzynowek were elected to the All-Maine team. Yuskis hit .269 including three home runs and was outstanding at second base, while Krzynowek had a fine ERA of 1.35, winning four and losing three.

The season opened in Massachusetts where Bates got an early 4-0 jump on the year, beating Lowell Tech, Brandeis, Northeastern, and Clark. The 2-1 victory over Northeastern was a big one as the Huskies went on to be chosen as District 1 representatives in the N.C.A.A. playoffs with Maine.

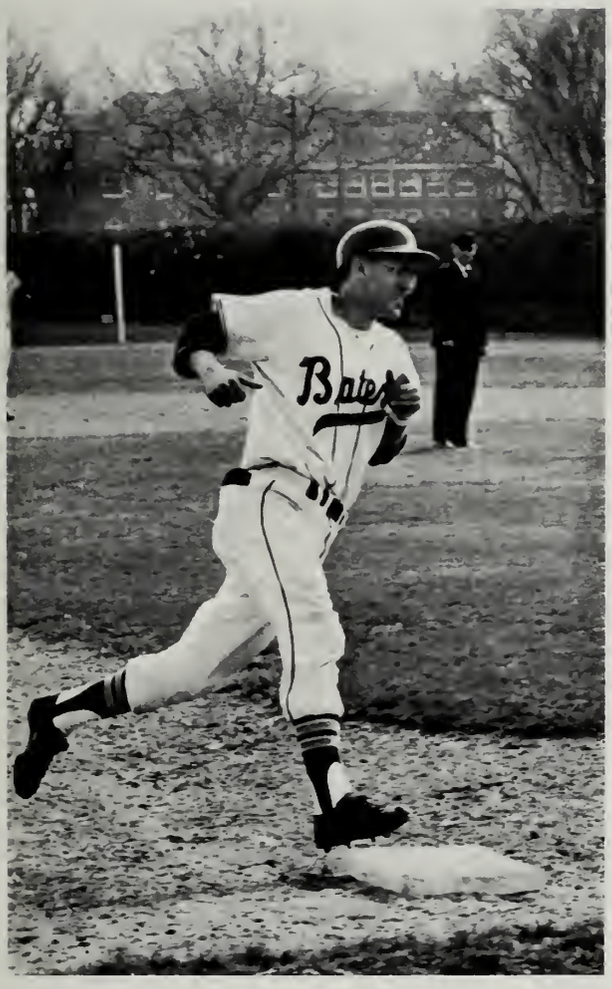
Returning home, the Bobcats lost to Maine and were shut out by Colby. M.I.T. fell and back to back victories over Bowdoin made the record 7-2. Losses to Tufts and Colby and to A.I.C. in extra innings set the mark at 7-5 with only Maine remaining.

The final game with Maine was, without a doubt, the most exciting of the season. Bates was down 2-0 with one out in the last of the eighth. Captain Paul Holt drew a walk and Yuskis belted a game-tying homer into right-center field. Lee Sweezey followed with a double and Randy Bales went down swinging. Then Bill MacNevin walked on a wild pitch that advanced the runners to second and third. Art Agnos connected for a clutch single driving in Sweezey and MacNevin. Mac sent "Stumpy" Merrill, the Maine catcher, sprawling as he crossed the plate and Agnos was tagged out attempting to score in the scramble. The score was 4-2. Maine went down one, two, three in the ninth under the superb pitching of Ted Krzynowek and Bates had beaten the team that would go on to the N.C.A.A. semi-finals in Nebraska.

In 1965, the Bobcats will miss slugger Lee Sweezey and shortstop Paul Holt, but Captain Bill MacNevin will head the eleven returning lettermen expecting an even better season.

Lee Swezey sends one deep to center.

Third baseman Bowden puts the tag on Tufts.



Captain Paul Holt rounds third after hitting a home run against Bowdoin.

Tom Carr singles to right in pinch hit role.

John Yuskis tips one foul in the Maine game.

Bill MacNevin warms up Bob Lanz.

Krzynowek fires a strike.

Yuskis leaps for a throw down to second against Colby.

Bob Lanz "discusses" a point as Coach Leahey looks on.

Al Cruickshank heads for home.

FIRST ROW: Martin Sauer, Ken Trufant, Dave Harrison, Dave Johnson, Captain Jon Ford, Dave Olson, Finn Wilhelmsen, Bob Kramer, Wayne Pangburn. *SECOND ROW:* Coach Walt Slovenski, Ron LeBlanc, Stu Anderson, Glenn Pierce, Tom Hiller, Keith Harvie, Allen Harvie, Paul Swensen, Keith Kreutzig. *THIRD ROW:* Manager Jon Peabody, Jon Wilska, Tom Flach, Bob Coleman, Harry Mossman, Jay Sweeney, Ed Wells, Bruce Lyman, Manager Bill Gosling. *FOURTH ROW:* Basil Richardson, Larry Brown, Paul Manganello, Larry Hathaway, Dick Traiser, Martie Traiser, Gary Chamberlain, Chris Mossberg. Absent: Ted Davis, Tom Bowditch, Eric Silverberg, Gerrit Binneweg, Paul Savello, Bill Davis, Dave Fulenwider, George Kahler, Assistant Coach Marshall Snow, Tim Hall.

eastern win highlights season

The Garnet boasts three great runners. Karl McKusick, a newcomer, won the mile against Colby-Brandeis-Norwich (C-B-N). In the same meet Finn Wilhelmsen of Norway won the two-mile, and came in second in the mile. He also performed well in the state meet, as did Eric Silverberg, another dependable and valued runner.

Al Harvie, who stars in the high hurdles, holds three consecutive wins (in competition with C-B-N, Boston College, and the state teams). He was also instrumental in the outstanding victory at the Easterns, and, as one of three team members chosen for the New Englands, placed fifth there. The 440-yard intermediate hurdles are a new event, and already there is a winner on the team. He is Tom Flach, who took first with C-B-N, and in the state meet, and also helped to win the Easterns.

There is a depth of talent in the pole vault. Chris Mossberg bettered his meet record of 13′ by reaching 13′½″ against C-B-N. He also won at Boston College, leading his fellow vaulters to the only complete Bates sweep of the day, and did creditably in the state meet. Bob Kramer won in the state and Eastern contests, and placed against Northeastern, Boston College and C-B-N. Jon Olsen, another competent athlete, also placed against Northeastern, B.C. and C-B-N. Teammate Tom Hiller held places against Boston College, and in the state meet.

Captain Jon Ford wins a close 220.

The 1.2.3 punch of Finn, Eric, and Karl scored many points in the distances.

Chris Mossberg, frosh pole sensation, makes another successful attempt.

Tom Flach, freshman speedster, off to another good start.

Allen Harvie, three time state high hurdle champion, exhibiting his excellent form.

Last year marked the start of another new event, the hop-step and jump. Bates again revealed competence, this time in the form of Paul Savello. He won against Northeastern with 42′5¾″, and improved this at the Easterns, by winning his double with a new record of 45′. Paul also demonstrated his skill at the broad jump, winning this event in the Easterns, taking second at Northeastern, and performing notably in the state meet. Bates has two star high-jumpers. Tom Bowditch consistently wins this event and set new records of 6′3″ at Northeastern, and 6′4½″ against Colby-Brandeis-Norwich. Tom was seconded by Dave Johnson at Northeastern and C-B-N. Dave also did well in the State meet.

Wayne Pangburn excels at the hammer throw, getting his first outdoor win against Colby-Brandeis-Norwich, taking second in the Easterns and giving a good performance in the State meet. Small wonder that he, too, was among the few selected to participate in the New Englands, where he placed 6th. Dave Harrison and Bill Davis followed Wayne's example by placing in this event with CBN. When it comes to throwing the javelin, Ron LeBlanc sets the pace. He boasts wins in the Easterns, and against CBN, his first outdoor meet. Ron turned in a notable second at Boston College, and placed in this event as another New Englands participant. Teammates Jon Wilska and Ted Hall also placed at Boston College.

Others who deserve commendation for a fine performance in the all-important State meet are Eric Silverberg, Martie Sauer, Gerrit Binneweg, Paul Manganello, Keith Harvie, Jay Sweeney and Gary Chamberlain.

After an inspiring effort on the part of the aforementioned individuals and numerous others, Bates ended another year of hard personal competition. Its seven-month season has seen many hopes, disappointments, and personal triumphs, all of which cannot be mentioned here. Yet each athlete who participated finds himself somehow richer for having done so.

Bob Kramer, the other half of a one-two pole vault combination.

RELAY TEAM: Tom Flach, Jon Ford, Paul Williams, Gerrit Binnewig, Jay Sweeney with Coach Walt Slovenski.

Jay Sweeney exhibiting strong form on his relay leg.

Tom Bowditch, state high jump champion, goes over again.

Wayne Pangburn, scoring in the weights, has improved Bates' performance considerably.

Box Score

Opponent	Bates
Northeastern	lost
Colby-Brandeis-Norwich	won
Boston University-Boston College	second
State meet	second
Easterns	won

Paul Savello in one of many fine jumps which consistently adds to the Bates score.

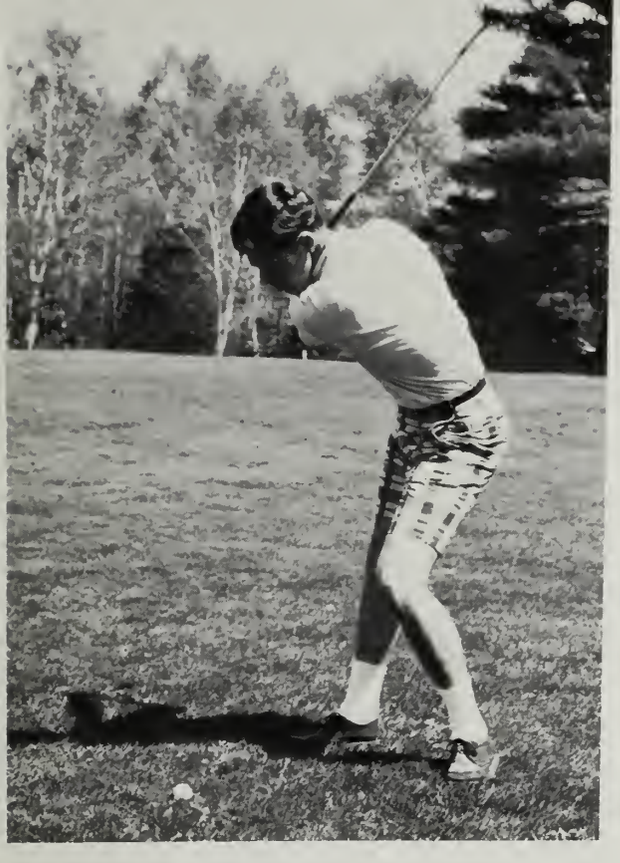
Keith and Allen Harvie, a potent brother combination in the hurdles.

golf

Graduation took only one member from the 1964 squad which posted a 9-11 mark in match-play competition. This was, nevertheless, a costly loss, removing Charles Lasher, who as the number one man for the past three years compiled a brilliant 19-1 record. His only loss was a tense one down affair to Alan Kidder of U.N.H. In addition to this he paced the Bates contingent at the New Englands where the steady play of Walt Lasher, Brad Ackerman, and Lynn Simpson contributed to a fine seventh place finish for the Bobcats out of thirty-five competing teams.

Returning lettermen include captain elect and defending M.I.A.A. champion, Walt Lasher, Brad Ackerman, Lynn Simpson and Bill Farrington, who are all members of the team which performed so well in the New Englands. Rounding out the group of lettermen is Ed Rockett whose early victories last spring proved to be the decisive factor in several matches. In addition, there are several very promising freshmen who provide strength throughout the lineup. With the able tutelage of Coach Roy Sigler to sharpen everyone's game, the 1965 golf team should be one of the best in Bates' history.

FIRST ROW: Coach Roy Sigler, Rick Powers, Lyn Simpson, Walt Lasher, Brad Ackerman, Don Delmore. *SECOND ROW:* Bill Farrington, Chuck Lasher, Doug Macko, Ed Rockett.



Walt Lasher displays form which won him the State Individual Championship.

*State Series Game

Rob Thompson in one of his powerful serves.

George Beebe meets the ball with a back-hander.

The 1964 Bates College Tennis Team, lacking the prowess displayed in the 1963 Season, played 12 matches, winning half of these. However, tennis enthusiasts had the opportunity to appreciate the play of six veterans: Captain Jim Wallach, Bob Thompson, George Beebe, Al Williams, Todd Lloyd and Dick Danosky. Three new members on the courts, Bob Ahern, Dave Heckman, and Ken Blank gave the team an easier season than it might otherwise have had.

The Peckman were off to a slow start with a three-match Boston trip, where they decisively beat Clark University, but lost to Tufts and Babson Institute. These losses may be partially explained by the absence of George Beebe and Todd Lloyd, who had both incurred injuries prior to the trip, and were unable to play. Following their return to the lineup, the team became much stronger.

The netmen seem to do much better against Colby and out-of-state teams, for they dealt defeats to Brandeis, Lowell Tech., and U.N.H., and decisively downed Colby twice. The Bobcats, however, lost twice to U. Maine and Bowdoin, thus earning a third place standing in the state series.

For the state tournament, held at Bates, Wallach and Thompson entered the singles. Jim Wallach reached the finals, but was eventually vanquished by Bowdoin's Art McDonald, after a gruelling match held in the Augusta Armory because of rain. Heckman and captain-elect Beebe, reached the finals as a doubles team, but there fell victim to Hecht and McDonald of Bowdoin.

The racketmen confidently expect a more successful season in 1965.

Captain Jim Wallach straining every muscle to return a low shot.

women's sports

Hi-Ho-Brownie

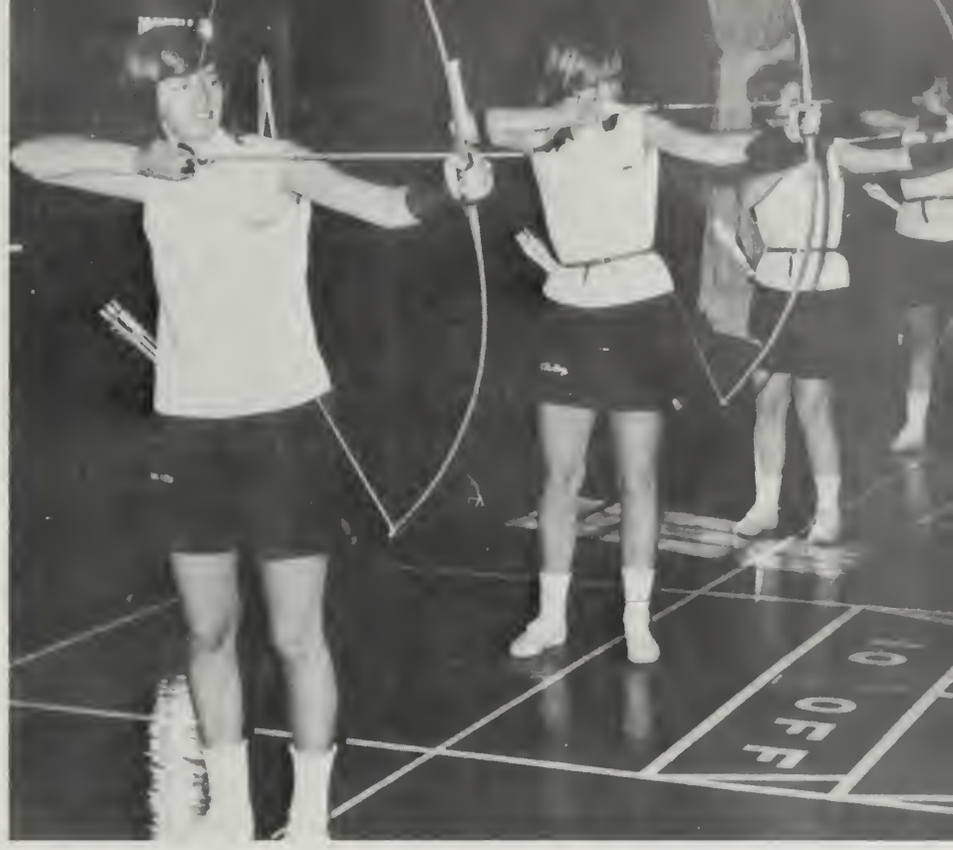
"Who's bowlegged?" More than one Bates woman may have indignantly responded to this question as she galloped into the den. This year more women than ever have taken advantage of the opportunity to go horseback riding in the fall. Twice a week these women go over to Thurstonia Riding School where they learn to ride and are trained in the proper care of horses. Mrs. Thurston instructs riders according to their ability in her large indoor ring. Here the students practice their techniques. Control of the horse is very important to proper handling as a few riders have discovered when the horse has suddenly taken off through the woods. Riding club is open to any Bates students who do not elect riding as part of the physical education program. Meeting once a week. students ride both indoors and outdoors practicing techniques or just riding for enjoyment.

Amateur Robin Hoods improve their bowmanship on the archery field every fall. Women practice at different distances. ranging from 20 to 50 feet and keep records of their progress. Lions. tigers. and panthers are the usual targets. but occasionally an open window in J. B. is the proud recipient of some misguided co-ed's arrow.

Those who want more exercise use energy trampling the grass as they tear up and down the hockey field. Girls developing their skill may qualify to play for the Bates hockey team against Colby and the University of Maine in the annual women's hockey playday.

The eyes of J.B. are upon you.

You suffer from vertigo?



Don't worry, you won't feel a thing.

Cupid strikes again.

fall sports

That's what you think.

Poetry in commotion

winter sports

"It's like tapping baby's bottom."

". . . and this big bird flew over . . ."

Sue Spaulding joins the Celtics.

"I saw him first."

Track! Skiing has long been the favorite winter sport of Bates women. Whether it be schussing down the slopes of Lost Valley in Auburn once a week, or practicing the snowplow and herringbone on good old Mount David, Bates women have plenty of opportunity to ski.

Ski conditioning classes are also offered where women do exercises to get ready for the slopes. At the beginning of the season women are provided material for waxing, lacquering and repairing skis.

Among the indoor winter sports, volleyball is probably most popular. Women start off the season with drills and progress to hard fast games of skill. Besides the opportunity in physical education classes, women form teams for stiff inter-dorm competition. Basketball season is also supplemented with inter-dorm competition leading to games with Colby and the University of Maine.

This year for the first time, modern dance has been added as an elective. Under the supervision of Mrs. Leonard Plavin, Bates women learn the fundamentals of modern dance and go on to practice routines of their own.

Any woman feeling especially aggressive is invited to take out her hostilities in fencing classes. Those who develop their skills in fencing have the opportunity to enter the New England Inter-Collegiate Fencing Tournament.

"I know the Upper Cascades are that way, I just slid down."

I caught one!

Steph, she soars through the air with the greatest of ease.

spring sports

Bobcat for Bogdanski.

The last of the Spring slush sees Bates women active from the softball field to the tennis courts. Last year, for the first time women taking golf as part of their physical education requirements were able to go to Martindale Golf Course twice a week to play eighteen holes.

For those interested in more physical activity, lacrosse can be a fast hard game of skill. Our maidens of the Androscoggin merrily run up and down J.B. field waving their crosses in hopes of catching the ball, much as the Indians who invented the game did. One major difference is that the Indians had no boundaries but the plains; they just ran as far as they could before dropping from exhaustion.

Spring is also the time for un-organized activity when books seem so much less important than a good mountain climb or bike hike. Tennis has always been a favorite with Bates women. Every Spring many exams and papers fall under the light step of sneakers dashing to return a spectacular serve.

"The bird, the bird, the bird is a word."

I guess that was a leaf after all.

A sure bogie this time . . .

Come a little bit closer, you're my kind of ball.

Heel, toe, heel, toe, tap, tap, tap.

Next week we get to try it five yards from the net.

Twinkle, twinkle little star . . .

swimming

Last year Dr. Dillon introduced Senior Life Saving and Water Safety Instructor courses as physical education electives. Since then the program has expanded to include synchronized swimming. Bates students go to the Auburn YMCA twice a week for instruction under Dr. Dillon and student assistants. Senior Life Saving has become especially popular this year, most probably due to the invitation to men to participate in the program.

The primary emphasis in Senior Life Saving is Safety — being always aware of the dangers in and near water. In the course, men and women learn how to properly approach a victim whether he be struggling or unconscious, and then how to block his attempts at grasping the rescuer while he gets the victim in a position to swim ashore. If the victim does get the rescuer in a strong hold, the rescuer has learned the very important methods of escape. The cross-chest carry, the tired swimmer's carry, and the hair carry are a few of the necessary skills learned in life saving. Principles of artifical respiration, as well as mouth to mouth resuscitation, are practiced. The course is concluded with a test in practical application. Everyone is required to pass a reaction test where he must save a struggling victim using the means he has been taught.

The Water Safety Instructor course is open to those who have passed Senior Life Saving. The first half of the course is devoted to improving swimming methods; individual strokes and kicks are studied and criticized by the rest of the class. When techniques have been perfected, the women are prepared to teach swimming. The assembly line method of teaching is used, where the teacher instructs her pupils how to swim step by step. Adjustment to the water is one of the more important fundamentals in teaching children how to swim. Each woman is criticized by the rest of the class at every point in her lesson. Upon completion of the course, women are qualified to teach Senior Life Saving and Water Safety as well as swimming.

Dauntless Batesy knights courageously attack the turbulent surf to save their drowning damsels in distress.

"But he's supposed to be above the surface!"

What co-ed can forget those XBX exercises?

women in action

One, two, three, O'Leary!

"A co-ed dorm at Bates?"

wara

The purposes of the Bates College Women's Athletic and Recreation Association are to provide an opportunity for all members to participate in recreational and athletic activities in cooperation with the Department of Physical Education for Women; to encourage good sportsmanship and a spirit of cooperation; and to promote an interest in the constructive use of leisure time in college and beyond.

All women students of the College are members of the Association, and are invited to participate in interdorm competition in basketball and volleyball.

The first Thursday of every month is known as W.A.R.A. Fun Night. These Fun Nights allow relaxed and informal participation in Bowling, Skating, Volleyball, Softball, Skiing, Swimming, and Archery.

Each year members of W.A.R.A. participate in two sports days with the University of Maine and Colby College, one being held in the fall, the other being held in the winter. In addition there is inter-collegiate competition in Basketball, Volleyball, Tennis, Badminton, Hockey, Bowling, and Fencing. This competition is frequently scheduled with Plymouth College and Westbrook Junior College as well as with the University of Maine and Colby College.

Bates women sharpen their skills in preparation for the fencing tournament.

Rita Sorensen taps the ball to Sara Schenck.

intramurals

Janis Beatty practices modern dance on the courts.

Debbie Welsh is first again!

candids

The lively ones.

Eat those Botany labs right up!

So I paint them by numbers, what's the difference?

You sure the water will kill the formaldahyde smell?

I think it went down my shirt.

Are you sure I get 3 credits for this?

Let's have another verse . . .

Quite the co-ed!

Don't worry, Lyn, we'll get your fingers out.

You mean your mother does this for you every morning?

Heard the latest elephant joke?

Good morning, lovelies.

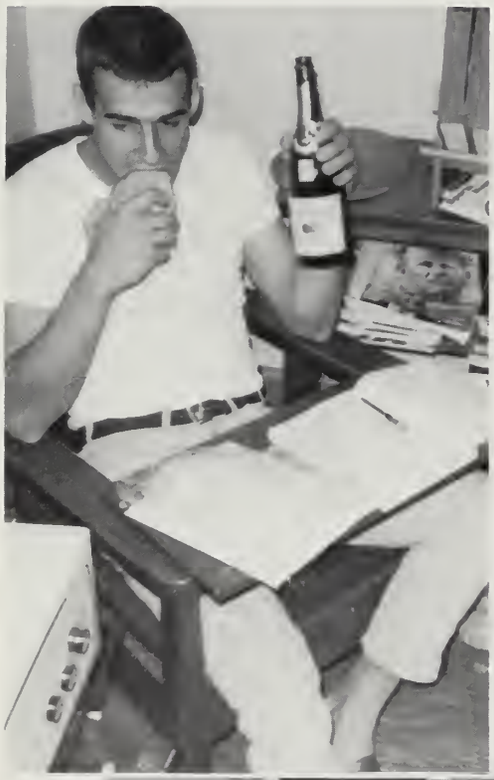
Sooner or later I'll have to face this meal.

Happy Birthday, Baby!

Wheel of Fortune

So the infirmary said, "What you need is . . . "

007 mugs for next assignment.



"I know this picture isn't funny but you should see what was cropped!"

"Oh no sir, those are on lower Lisbon St.!"

Well, they found me out.

Charles Atlas never had it so good.

Serves her right!

Ever get that flushed feeling?

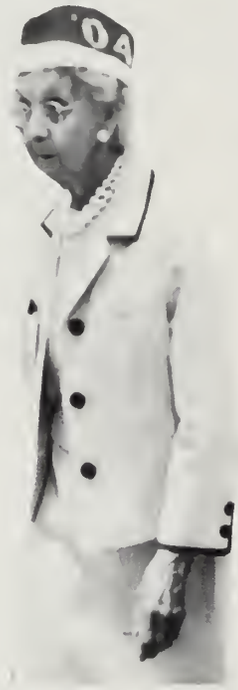
These panty raids are great!

That's a funny place for a birthmark.

graduation 1965

Carol Bishop, Sam Aloisi, Beth Krause, John Achenbach, Cindy Bagster-Collins, and Gene Safir relax in their cabin on Trip Lake.

Alumni, seniors and parents greet President Phillips and graduation dignitaries in rear of Page Hall.



The class of 1965 marches into Lewiston Armory for commencement exercises.

61 years ago . . .

Bob Bekoff and Al Harvie highlight Class Day with "Joe the bartender" routine.

Karen Smith receives her B.A. from President Charles F. Phillips at Ninety Ninth Commencement.

Graduation 1965 was a memorable event for all concerned. It began with senior week on Tuesday June 1 at the conclusion of final exams. Many seniors left immediately for Mount Katadin, a traditional senior week trip where one can see some of the finest scenery in Maine. Others took a trip to Bar Harbour to see the magnificent glacial lakes and Cadillac Mountain. Still other seniors rented cabins on Trip and Sabattus Lakes where they spent the week sunbathing, boating and partying.

Friday June 4 began a very hectic weekend with marching practices in the morning and afternoon. Parents, relatives and friends began arriving Friday evening. Saturday, along with many parents, thirteen alumni classes from 1905 to 1963 poured onto the campus. Saturday's festivities included an alumni banquet, a carillon concert and class day. Class day speeches were presented by Newt Clarke, Peter Gomes, Jeff Roualt, Carl Morrison, Marcia Flynn, Allen Harvie, Bob Bekoff and Ned Brooks on subjects ranging from the class history to the class will and horoscope. The afternoon's activities also included the President's reception given on the back lawn of Page Hall. Saturday evening Miss Lavinia Schaeffer produced "Scenes from Shakespeare" in the Little Theatre.

Sunday morning at 10:00 the Baccalaureate services were held in the Chapel. The guest speaker was Mrs. Sibley, a noted civic and religious leader from Rochester, New York. Commencement exercises were held in the Lewiston Armory on Sunday afternoon. In ceremonies lasting an hour and thirty minutes, Mr. Hoagland, director of the Worcester Biological Experimental Laboratory delivered the principle address and the various degrees were distributed.

It is with the exciting events of this June 6th weekend that the class of 1965 ended its four years of educational and social growth at Bates College.

Lend me the stone strength of the past and I will lend you
The wings of the future, for I have them.

— Robinson Jeffers
